Political Issues In New Zealand Education:

Political Issues in New Zealand Education John A. Codd, Richard Kendall Harker, Roy Nash, 1990 **Encyclopedia of Language and Education** Ruth Wodak, David Corson, 1997 Made up of eight volumes the Encyclopedia of Language and Education is the first attempt at providing an overview of the subject Reforming New Zealand Secondary Education R. Openshaw, 2009-08-31 This timely book argues that the New Zealand educational reforms were the product of longstanding unresolved educational issues that came to a head during the profound economic and cultural crisis of the 1970s and early 1980s Political Philosophy, Educational Administration and Educative Leadership Reynold Macpherson, 2013-10-01 In this book Reynold Macpherson initiates a politically critical theory of educative leadership as a fresh line of inquiry in the practice research and theory of educational administration and educational leadership Divided into four parts the book introduces the sub discipline of political philosophy to the field of educational administration management and leadership It does this by clarifying the knowledge domain of each and identifying how four political ideologies specifically pragmatism communitarianism communicative rationalism and egalitarian liberalism have primarily informed and surreptitiously provided contestable justifications for power in the development of practice research and theory in the field of study The book goes on to offer three case studies illustrating how political philosophy can be used to interpret how people become leaders and administrators of educational institutions and systems Additional case studies then demonstrate how crises in governance in educational institutions and systems can be analyzed and improvements made using the tools of political philosophy The final part uses the sub discipline to critique the author's decades of research into educative leadership and concludes the book by both establishing the relativity of politically critical critique and the ideology it favours neo pragmatism Political Philosophy Educational Administration and Educative Leadership will provide practitioners researchers and theorists in educational administration management and leadership with a deeper appreciation of power by formally introducing them to the assumptions limits and tools of political philosophy *Education Policy* Mark Olssen, John A Codd, Anne-Marie O'Neill, 2004-06-08 Education policy is now a global matter and all the more complex for that Mark Olssen John Codd and Ann Marie O'Neill do us an invaluable service in producing a carefully theorised guide to current issues and key concerns this is an important erudite and very practical book Stephen J Ball Education Policy Research Unit University of London Given the global reach of neoliberal policies we need cogent books that enable us to better understand the major effects such tendencies have Education Policy is such a book It is insightful and well written and should be read by all of us who care deeply about what is happening in education in international contexts Michael W Apple Author of *Educating the Right Way* and John Bascom Professor of Education University of Wisconsin Madison I really am taken with the book the range and depth of analysis are truly impressive This book is a magnum opus and everyone in the area should read it Hugh Lauder University of Bath In their insightful and comprehensive book on education policy Mark Olssen John Codd and Anne

Marie O'Neill wrestle with the big questions of citizenship and democracy in an age of globalization. They argue that education policy in the 21st century is the key to security, sustainability and survival. The book, anchored in the poststructuralist perspective of Michel Foucault, traverses the whole territory of education policy, not only methods and approaches of policy analysis and the dominant political perspectives that influence policy: classical liberalism, social democracy and neo-liberalism, but also those policy areas that require the closest scrutiny: markets, trust, professionalism, choice, diversity and finally community, citizenship and democracy. This is the new policy bible for educationalists; it is at once systematic, provocative and instructive.

Michael A. Peters, Research Professor, University of Glasgow. It is rare indeed for books with such ambitious scope as this one to appear within educational scholarship. This is an important book for any graduate student who is undertaking work on any aspect of education policy.

Education Review: This book provides an international perspective on education policy and of the role and function of education in the global economy. The authors present a Foucauldian perspective on the politics of liberal education within a theoretical framework necessary for the critical analysis of education policy. The authors set out the analyses necessary for understanding the restructuring in education and social policy that has occurred in many countries affected by the resurgence of neo-liberal political theory. They examine education policy in relation to globalization, citizenship and democracy. The authors argue that globalization is an extension of neoliberalism and is destructive of the nation-state, community and democracy. They show the importance of education in building strong democratic nation-states and global communities based on cultural identity and inter-cultural awareness. This book is essential reading for students of education policy studies and social policy analysis.

Schooling Reform In Hard Times Bob Lingard, John Knight, Paige Porter, 2003-09-02 Based on research carried out under Labour governments throughout the 1990s in Western Australia the authors consider the social political and economic conditions under which policy is formulated understood and enacted They look at how the state structure affects the content and nature of policy statements and provide an outline of the history of policy developments and point to future possibilities and probabilities Outcomes within funding ceilings accountability frameworks and national guidelines are but some of the changes referred to The emergence of competency based standards in education and training in schools workplaces and the professions is evident throughout Australia at state level but the concern is whether issues of education should be played out within the state and outside civil society The authors argue for the mediation in implementation of policy rather than a lambasting of policy formulation and implementation This text is intended for heads of education departments PGCE BEd MEd students and researchers interested in education policy and planning Education policymakers and educational historians

Baron,2014-06-28 Leading international scholars consider changes and developments in school government practice in the United States Canada England and Wales Scotland Australia New Zealand France West Germany Italy Denmark Norway and Sweden Each chapter looks at the introduction or reform of councils at school level designed to secure the involvement in decision making of parents teachers students and the local community Essential reading for everyone involved in educational administration this informative book will also be of interest to researchers of comparative education the politics of education and participatory developments in the field *Education and Change in the Pacific Rim* Keith Sullivan,1998-01-01 The chapters in this book provide a diverse set of topics perspectives and formulations about educational issues in a group of important Pacific Rim countries Each contributor explores an area of national educational importance for their particular country taking care to locate themselves within their own national context and then to look outwards to consider the educational relevance of the Pacific Rim and more generally globalisation *The Search for Better Educational Standards* Martin Thrupp,2017-08-22 This book deals with the development of New Zealand s standards system for primary school achievement Kiwi Standards which took effect from 2010 onwards and is becoming increasingly embedded over time The approach where teachers make Overall Teacher Judgements based on a range of assessment tools and their own observations rather than using any particular national test has created predictable problems with moderation within and across schools It has been claimed that this bold Kiwi Standards approach avoids the narrowed curriculum and mediocre outcomes of high stakes assessment in other countries Yet this book suggests it just produces another variant of the same problems and demonstrates that even a relatively weak high stakes assessment approach still produces performative effects The book provides a blow by blow account of the development of a policy including the continuous repositioning of New Zealand s Government as it has sought to justify the policy in the face of opposition from educators Indeed the Kiwi Standards tale provides a world class example of teachers fighting back against policy with the help of academics There is an indigenous M ori aspect to the story as well Finally this book also provides comparative international perspectives including responses from well known US English and Australian academics *A Companion to*

Research in Teacher Education Michael A. Peters, Bronwen Cowie, Ian Menter, 2017-05-31 This state of the art Companion assembles and assesses the extant research available on teacher education and provides clear guidelines on future directions It addresses an important need in a collection that will be of value for teachers teacher educators policymakers and politicians There has been little sustained long term or systematic research to provide empirical support for the broad aspects of teacher education policy largely because such research has been chronically underfunded and based on traditional practitioner knowledge Many of the changes to teacher education are contentious and yet are occurring in rapid succession These policies and movements have important consequences for education teacher quality and the future of the teaching profession At the same time the policies and initiatives that support these changes seem to be based more on ideology business interests and tradition than on research and empirical findings The nature quality and effectiveness of teacher preparation have increasingly become a central focus for education policy worldwide in a fiercely argued debate among governments think tanks world policy agencies education researchers and teacher organisations

English Language as Hydra Vaughan Rapatahana, Pauline Bunce, 2012-06-22 In far too many places the worldwide trade in English language teaching testing and publishing has become a self perpetuating self congratulating neocolonial monster a veritable multi headed Hydra Too often the English language industry aggressively promotes itself as some sort of uplifting essential proper or even better means of communication than any other language Unfortunately its relentless global outreach is taking place at the direct expense and the active denigration of local and regional languages not to mention individual identities English Language as Hydra brings together the voices of linguists literary figures and teaching professionals in a wide ranging expos of this monstrous Hydra in action on four continents It provides a showcase of the diverse and powerful impacts that this ever evolving gluttonous beast has had on so many non English language cultures as well as the surreptitious drug like ways in which it can infiltrate individual psyches
