The Rosetta Stone Robert Solé, Dominique Valbelle, 2001 **The Riddle of the Rosetta Stone** James Cross Giblin, 1993-02-28 Until the Rosetta Stone was finally translated and the decoding of hieroglyphic writing made possible much of Egyptian history was lost The author has done a masterful job of distilling information citing the highlights and fitting it all together in an interesting and enlightening look at a puzzling subject H The social and intellectual history here are fascinating A handsome inspiring book K Notable Children s Books of 1991 ALA Notable 1990 Children s Trade Books in Social Studies NCSS CBC Children s Books of 1990 Library of Congress 100 Books for Reading and Sharing NY Public Library Parenting Honorable Mention Reading Magic Award **The Mystery of the Hieroglyphs** Carol Donoughue, 2002-01-15 Explains how the hieroglyphic writing system of the ancient Egyptians began and how the discovery of the Rosetta stone helped break its code *The Rosetta Stone* Omar Khalil, The discovery of the Rosetta Stone in 1799 was a momentous event in the history of archaeology and linguistics The stone a large slab of granodiorite was found by a French soldier named Pierre Fran ois Bouchard during Napoleon Bonaparte s military campaign in Egypt While working near the town of Rashid or Rosetta Bouchard uncovered the stone which contained an inscription in three different scripts Ancient Greek Egyptian hieroglyphs and Demotic At the time Egypt was under French control and the discovery was initially made by a team of French engineers working on fortifications The significance of the stone would not be immediately apparent as the study of hieroglyphs had long been a mystery to scholars Despite attempts by earlier scholars no one had yet succeeded in translating the ancient Egyptian script leaving a vast portion of Egypt s history locked away The discovery of the Rosetta Stone however offered a potential breakthrough due to its trilingual inscription which allowed for comparison between the known Greek text and the two unknown Egyptian scripts The stone s inscription itself was a royal decree issued in 196 BCE by the Egyptian priests in honor of King Ptolemy V Epiphanes It celebrated his reign and the various accomplishments he had achieved including his efforts to maintain peace and the prosperity of Egypt The decree was written in three scripts to ensure it would be understood by various segments of society the Greek script for the Greek speaking rulers and officials the Demotic script for the common Egyptian people and the hieroglyphic script for the priests and religious authorities

Wallis Budge,2016-01-30 The Rosetta Stone is a granodiorite stele inscribed with a decree issued at Memphis Egypt in 196 BC on behalf of King Ptolemy V The decree appears in three scripts the upper text is Ancient Egyptian hieroglyphs the middle portion Demotic script and the lowest Ancient Greek Because it presents essentially the same text in all three scripts with some minor differences among them the stone provided the key to the modern understanding of Egyptian hieroglyphs The stone is believed to have originally been displayed within a temple possibly at nearby Sais It was probably moved during the early Christian or medieval period and was eventually used as building material in the construction of Fort Julien near the town of Rashid Rosetta in the Nile Delta It was rediscovered there in 1799 by a soldier named Pierre Francois Bouchard of the Napoleonic expedition to Egypt It was the first Ancient Egyptian bilingual text recovered in modern times and it aroused widespread public interest with its potential to decipher this previously untranslated ancient language Study of the decree was already under way when the first full translation of the Greek text appeared in 1803 It was 20 years however before the transliteration of the Egyptian scripts was announced by Jeas Francois Champollion in Paris in 1822 it took longer still before scholars were able to read Ancient Egyptian inscriptions and literature confidently Major advances in the decoding were recognition that the stone offered three versions of the same text 1799 that the demotic text used phonetic characters to spell foreign names 1802 that the hieroglyphic text did so as well and had pervasive similarities to the demotic Thomas Young 1814 and that in addition to being used for foreign names phonetic characters were also used to spell native Egyptian words Champollion 1822 1824

The Last Man Who Knew Everything Andrew Robinson,2023-05-09 No one has given the polymath Thomas Young 1773 1829 the all round examination he so richly deserves until now Celebrated biographer Andrew Robinson portrays a man who solved mystery after mystery in the face of ridicule and rejection and never sought fame As a physicist Young challenged the theories of Isaac Newton and proved that light is a wave As a physician he showed how the eye focuses and proposed the three colour theory of vision only confirmed a century and a half later As an Egyptologist he made crucial contributions to deciphering the Rosetta Stone It is hard to grasp how much Young knew This biography is the fascinating story of a driven yet modest hero who cared less about what others thought of him than for the joys of an unbridled pursuit of knowledge with a new foreword by Martin Rees and a new postscript discussing polymathy in the two centuries since the time of Young It returns this neglected genius to his proper position in the pantheon of great scientific thinkers

Cracking the Egyptian Code Andrew Robinson,2012-05-01 In 1799 Napoleon s army uncovered an ancient stele in the Nile delta Its inscription recorded in three distinct scripts ancient Greek Coptic and hieroglyphic would provide scholars with the first clues to unlocking the secrets of Egyptian hieroglyphs a language lost for nearly two millennia More than twenty years later a remarkably gifted Frenchman named Jean Francois Champollion successfully deciphered the hieroglyphs on the stele now commonly known as the Rosetta Stone sparking a revolution in our knowledge of ancient Egypt Cracking the Egyptian Code is the first biography in English of Champollion widely regarded as the founder of Egyptology

Andrew Robinson meticulously reconstructs how Champollion cracked the code of the hieroglyphic script describing how Champollion started with Egyptian obelisks in Rome and papyri in European collections sailed the Nile for a year studied the tombs in the Valley of the Kings a name he first coined and carefully compared the three scripts on the Rosetta Stone to penetrate the mystery of the hieroglyphic text Robinson also brings to life the rivalry between Champollion and the English scientist Thomas Young who claimed credit for launching the decipherment which Champollion hotly denied There is much more to Champollion's life than the Rosetta Stone and Robinson gives equal weight to the many roles he played in his tragically brief life from a teenage professor in Revolutionary France to a supporter of Napoleon whom he met an exile and a curator at the Louvre Extensively illustrated in color and black and white pictures *Cracking the Egyptian Code* will appeal to a wide readership interested in Egypt decipherment and code breaking and Napoleon and the French Revolution *The Ancient World* Sarolta Anna Takacs, Eric H. modest appetite for adventure he has trekked in the Khumbu and Annapurna regions of Nepal the Peruvian Andes and Patagonia His hobby apart from writing has been a love of all things motorcycling from touring remote areas and attending races to complete restoration of vintage motorcycles He has motorcycled throughout parts of his native Australia North America New Zealand Iceland Bolivia Peru Turkey the Himalaya Morocco Greece and eastern Europe His business and holiday travels have taken him through sixty countries and all continents including Antarctica Evolution is defined as the change in the heritable characteristics of biological populations over successive generations resulting in changes in both the genotype and phenotype The evidence for evolution is primarily circumstantial being based on fossils of extinct species physical similarities and a largely common genome Charles Darwin believed that all species of organisms arise and develop through the natural selection of small inherited variations that increase the individual's ability to compete survive and reproduce Today we know so much more than Darwin did 150 years ago leading many scientists to discard genetic mutation and natural selection as having the development power previously ascribed to them What has been missing in the science so far is systems thinking a holistic approach to analysis that focuses on the way that a system's constituent parts interrelate and how systems work over time and within the context of larger systems Questioning whether the mind consists of organs of the brain an emergent property of the brain or activities of the brain as scientists suggest the author has concluded for none of these The brain being physical it can only deal with the physical but the mind deals in the conceptual which has no physical properties With his background in related technologies the author has compared the human nervous system with telemetry systems as used in modern aircraft vehicles and other applications Though implemented differently the functional requirements remain the same which has prompted a different perspective on how it could have evolved The telemetry system in the human body is astounding in its complexity accuracy and reliability leading to the author's doubts as to its claimed evolutionary origins Crossing a Chasm is an analysis of the probability that such could be accomplished by innumerable unguided small steps over whatever time
