Welcome to the 12th International Conference on Rough Sets Fuzzy Sets Data Mining and Granular Computing RSFDGrC 2009 held at the Indian Institute of Technology IIT Delhi India during December 15-18, 2009. RSFDGrC is a series of conferences spanning over the last 15 years. It investigates the meeting points among the four major areas outlined in its title. This year it was co-organized with the Third International Conference on Pattern Recognition and Machine Intelligence PReMI 2009 which provided additional means for multi-faceted interaction of both scientists and practitioners. It was also the core component of this year's Rough Set Year in India project. However, it remained a fully international event aimed at building bridges between countries. The first section contains the invited papers and a short report on the above mentioned project. Let us note that all the RSFDGrC 2009 plenary speakers Ivo Dantsch, Zbigniew Suraj, Zhongzhi Shi, Sergei Kuznetsov, Qiang Shen, and Yukio Ohsawa contributed with the full length articles in the proceedings. The remaining six sections contain 56 regular papers that were selected out of 130 submissions, each peer-reviewed by three PC members. We thank the authors for their high quality papers submitted to this volume and regret that many deserving papers could not be accepted because of our urge to maintain strict standards. It is worth mentioning that there was quite a good number of papers on the foundations of rough sets and fuzzy sets, many of them authored by Indian researchers.

The fuzzy set theory has been popular in India for a longer time. Now we can see the rising interest in the rough set theory.

Transactions on Rough Sets IX, Henryk Rybinski, 2008-12-18. This book is the ninth volume of the Transactions on Rough Sets series. The 26 papers in it introduce new advances in the foundations and applications of artificial intelligence, engineering, image processing, logic, mathematics, medicine, music, and science. *Thriving Rough Sets*, Guoyin Wang, Andrzej Skowron, Yiyu Yao, Dominik Ślęzak, Lech Polkowski, 2017-04-28. This special book is dedicated to the memory of Professor Zdzisław Pawlak, the father of rough set theory, in order to commemorate both the 10th anniversary of his passing and 35 years of rough set theory.

The book consists of 20 chapters distributed into four sections which focus in turn on a historical review of Professor Zdzisław Pawlak and rough set theory, a review of the theory of rough sets, the state of the art of rough set theory, and major developments in rough set based data mining approaches. Apart from Professor Pawlak's contributions to rough set theory, other areas he was interested in are also included. Moreover, recent theoretical studies and advances in applications are also presented. The book will offer a useful guide for researchers in Knowledge Engineering and Data Mining by suggesting new approaches to solving the problems they encounter. *Transactions on Rough Sets XI*, 2010-01-10.

Volume XI of the Transactions on Rough Sets TRS provides evidence of further growth in the rough set landscape both in terms of its foundations and applications. This volume provides further evidence of the number of research streams that were either directly or indirectly initiated by the seminal work on rough 1-sets by Zdzisław Pawlak (1926-2006). Evidence of the growth of various rough 2-set based research streams can be found in the rough set database.

This volume contains articles introducing advances in the foundations and applications of rough sets. These advances include
