Regulation and Compliance in the Atlantic Fisheries Stig S. Gezelius, 2012-12-06 This is a book about fishermen s reasons for obeying fisheries law The fish harvesting industry has become subject to state interference to an increasing extent over the past twenty years As natural resources become scarce and subsequent fisheries regulations abound the question of law abidingness is brought to the public agenda However there is still little empirical data as regards the dynamics of compliance in this field and this book aims to meet a demand for in depth knowledge The cases studied can be regarded as instances of economies dependent on the harvesting of natural resources for both household and the market and the study aims to contribute to the building of more adequate theory on the dynamics of compliance in such economies However focusing on a specific type of setting seldom constitutes a safe escape route for getting away from more pervasive sociological questions and it certainly does not in this case As any attempt to explain social phenomena this study is faced with the fundamental sociological question of how the acts of individuals can best be understood The question concerns the interface between the individual and the collectivity between collective morality and self interest It thus deals with classical sociological issues such as the nature and regulatory capacity of group norms and sanctions and the forms and roles of rationality and strategic action

World Small-scale Fisheries Ratana Chuenpagdee, 2011 The importance of fisheries is not lost in the global policy arena What is often overlooked in the general discourse however is the significant difference between small and large scale fisheries Major rethinking about all aspects of small scale fisheries is required including their contribution to catches employment livelihood food security and conservation This book is a collection of essays about the diverse complex and dynamic contexts that characterize small scale fisheries around the world The essays highlight the strengths capacity motivation and contributions associated with this fishing sector They remind us that solutions and opportunities for the viability and sustainability of small scale fisheries can be found once the issues are understood from a holistic perspective and possible options including inventive governance arrangements are fully explored The authors are scientists and practitioners who work in small scale fisheries in various parts of the world many of whom participated at the first World Small Scale Fisheries Congress WSFC held in Bangkok in October 2010 and are members of the global research network for the future of small scale fisheries Too Big To Ignore The editor Ratana Chuenpagdee the initiator of the WSFC is Canada Research Chair in Natural Resource Sustainability and Community Development at Memorial University of Newfoundland Canada Book jacket

often translate into wisdom Whether the immediate challenge is global warming epidemic disease poverty environmental degradation or social fragmentation our research efforts are all wasted if we cannot devise processes to create and transfer knowledge to policy makers interested groups and ordinary people in a manner that is efficient and understandable How we maximize the impact of the research that scholars do and how to combine that with knowledge already extant in lay or local communities are key issues in a world with scarce research resources and numerous social and scientific conflicts Making and Moving Knowledge focuses directly on how knowledge is created transferred and used and perhaps most important how it is blocked and atrophies It treats knowledge generated by universities and governments alongside traditional and practical knowledge generated in coastal aboriginal and non aboriginal communities and looks at how the different kinds flow in different directions The chapters are theoretical methodological and applied as the authors model their commitment to knowledge transfer in their work with community academics and policy makers Canadian Books in Print.
