The International Politics of Communication Alan Chong,2025-03-18 In an era of globalization international communication constantly takes place across borders defying sovereign control as it influences opinion While diplomacy between states is the visible face of international relations this informal diplomacy is usually less visible but no less powerful Information politics can be found in propaganda Internet politics educational exchanges tourism and even popular film *The International Politics of Communication* examines this informational dimension of international politics

investigating how information is generated conveyed through channels and directed specifically at audiences While citizens are often portrayed as faithfully loyal supporters and beneficiaries of the modern nation state a fiction supported by passports identification papers and other notarized credentials they are subject to the pulls of loyalty from transnational tribal affiliations mythological and historical narratives of ethnicity as well as the transcendental claims of religion and philosophy Increasingly social media also enchants non state individuals providing new virtual communities as the center of loyalties rather than national affiliations By reinterpreting taken for granted concepts in journalism media political economy nationalism development and propaganda as information politics this book prepares serious minded scholars citizens politicians and social activists everywhere to understand the power plays in international communication and use alternatives to begin transforming power relations

Distant Early Warning Alex Kitnick, 2021-06-29 Marshall McLuhan 1911 1980 is best known as a media theorist many consider him the founder of media studies but he was also an important theorist of art Though a near household name for decades due to magazine interviews and TV specials McLuhan remains an underappreciated yet fascinating figure in art history His connections with the art of his own time were largely unexplored until now In *Distant Early Warning* art historian Alex Kitnick delves into these rich connections and argues both that McLuhan was influenced by art and artists and more surprisingly that McLuhan's work directly influenced the art and artists of his time Kitnick builds the story of McLuhan's entanglement with artists by carefully drawing out the connections among McLuhan his theories and the artists themselves The story is packed with big names Marcel Duchamp Niki de Saint Phalle Jasper Johns Andy Warhol Nam June Paik and others Kitnick masterfully weaves this history with McLuhan's own words and his provocative ideas about what art is and what artists should do revealing McLuhan's influence on the avant garde through the confluence of art and theory The illuminating result sheds light on new aspects of McLuhan showing him not just as a theorist or an influencer but as a richly multifaceted figure who among his many other accolades affected multiple generations of artists and their works The book finishes with Kitnick overlaying McLuhan's ethos onto the state of contemporary and post internet art This final channeling of McLuhan is a swift and beautiful analysis with a personal touch of art's recent transgressions and what its future may hold

The Poetics of Information Overload Paul Stephens, 2015-07-30 Information overload is a subject of vital ubiquitous concern in our time *The Poetics of Information Overload* reveals a fascinating genealogy of information saturation through the literary lens of American modernism Although technology has typically been viewed as hostile or foreign to poetry Paul Stephens outlines a countertradition within twentieth and twenty first century literature in which avant garde poets are centrally involved with technologies of communication data storage and bureaucratic control Beginning with Gertrude Stein and Bob Brown Stephens explores how writers have been preoccupied with the effects of new media since the advent of modernism He continues with the postwar writing of Charles Olson John Cage Bern Porter Hannah Weiner Bernadette Mayer Lyn Hejinian and Bruce Andrews and

concludes with a discussion of conceptual writing produced in the past decade By reading these works in the context of information systems Stephens shows how the poetry of the past century has had as a primary focus the role of data in human life
