ABOUT THE BOOK Original publication 1869 Around the Moon is the sequel to Jules Verne's 1865 novel From the Earth to the Moon. It is a science fiction tale which continues the trip to the Moon that was only begun in the first novel. Having been fired out of the giant Columbiad space gun the Baltimore Gun Club's bullet shaped projectile along with its three passengers Barbicane Nicholl and Michel Ardan begins the five day trip to the Moon. A few minutes into the journey a small bright asteroid passes within a few hundred yards of them but does not collide with the projectile. The asteroid had been captured by the Earth's gravity and had become a second moon. The three travelers undergo a series of adventures and misadventures during the rest of the journey including disposing of the body of a dog out a window suffering intoxication by gases and making calculations leading them briefly to believe that they are to fall back to Earth. During the latter part of the voyage it becomes apparent that the gravitational force of their earlier encounter with the asteroid has caused the projectile to deviate from its course. Round the Moon Jules Verne,1876 **From the Earth to the Moon, and a Trip Around It** Jules Verne,2013-12-24 Jules Verne was an incredible visionary His two stories regarding the first attempts by man to leave the surface of the Earth travel across a vast distance and visit our satellite were incredible for the time in which they were written But even more so in that Verne predicted that Florida in the United States would be the point of takeoff and that three men would take part in the journey There are many other surprises in store for the reader and though Verne was incorrect on a few details it is almost as if he had visited his future and witnessed the events This is a combination of the two stories detailing the trip and the return to our planet Eighty illustrations accompany the text This is a fine translation of Verne's original French writings with only minor interference by several editors over the years to standardize spellings and correct a few obvious typos

close to reality However his scenario turned out to be impractical for safe manned space travel since a much longer muzzle would have been required to reach escape velocity while limiting acceleration to survivable limits for the passengers The character of Michel Ardan the French member of the party in the novel was inspired by the real life photographer Felix Nadar
