The Temporal Mechanics of the Fourth Gospel Douglas Charles Estes, 2008-03-31 Spiritual but broken theological but flawed these are the words critics use to describe the Gospel of John Compared to the Synoptics John's version of the life of Jesus seems scrambled especially in the area of time and chronology But what if John's textual and temporal flaws have more to do with our implicit assumptions about time than a text that is truly flawed This book responds to that question by reinventing narrative temporality in light of modern physics and applying this alternative temporal lens to the Fourth Gospel From the singularity in the epic prologue to the narrative warping of event like objects this work explodes the elemental temporalities simmering below the surface of a spiritual yet superior Gospel text

En mars 2013, une quinzaine d'astrophysiciens sous le gide de l'Agence spatiale européenne rendait publiques des images inédites d'une extraordinaire précision du rayonnement fossile de l'Univers ses tout débuts. Des clichés pris par le satellite européen Planck lancé en 2009 d'une résolution dix fois supérieure celle du dernier disponible pris par la NASA en 2003 qui ramènent quelque 13,8 milliards d'années en arrière 380 000 ans seulement après sa naissance le Big Bang. Parmi eux, une carte complète de ce fond diffus cosmologique qui dévoile le cosmos en formation soit une moisson de renseignements majeurs quant à sa genèse et composition au carrefour de la cosmologie et de la physique des particules, entre validation voire révision de prévisions prévues par les théoriciens et observation d'anomalies inattendues expliquer. De quoi notamment saisir pour la première fois quoi a ressemblé le Big Bang tape-ciel de nos origines et alimenter la recherche relative à ce qui l'a précédé.

Le domaine des thèses de doctorat respectives des auteurs. En talentueux passeurs Igor et Grichka BOGDANOV pionniers de la vulgarisation scientifique tant éditoriale que télévisuelle proposent l'intention du plus large public curieux ou passionné le premier titre consacré aux résultats de la mission Planck. Les frères Bogdanov y relatent avec verve la manière dont la collaboration Planck s'inscrit dans la continuité historique en forme de saga pleine de rebondissements d'une discipline jalonnée de grands noms pour beaucoup nobles d'Edwin Hubble, Stephen Hawking et Georges Smoot en passant par Alexandre Friedmann, Georges Gamow, Edward Teller, Henrietta Lewitt, Robert Wilson et Arno Penzias, entre autres dont ils rappellent les démarches et contributions d'ailleurs contextualisées. Igor et Grichka exposent par ailleurs les enjeux, questionnements et défis associés aux premières données publiées et reviennent plus spécifiquement sur les questions de la forme de l'Univers du sens de sa création et bien sûr de l'avant Big Bang. Esprits indépendants, les Bogdanov se risquent ce faisant à ouvrir le débat, interpréter, formuler de nouvelles hypothèses et esquisser des pistes de réflexion dans le sillage de quelques astrophysiciens de renom dont des collaborateurs de la mission Planck dont ils relaient les déclarations et commentaires hétérodoxes. Un rendez-vous ne pas manquer dans l'enfance de l'Univers en compagnie d'un duo de spécialistes pour mieux comprendre et suivre les grisantes découvertes en cours.
