International Handbook of Interpretation in Educational Research Paul Smeyers, David Bridges, Nicholas C. Burbules, Morwenna Griffiths, 2015-01-06 This handbook focuses on the often neglected dimension of interpretation in educational research It argues that all educational research is in some sense interpretive and that understanding this issue belies some usual dualisms of thought and practice such as the sharp dichotomy between qualitative and quantitative research Interpretation extends from the very framing of the research task through the sources which constitute the data the process of their recording representation and analysis to the way in which the research is finally or provisionally presented The thesis of the handbook is that interpretation cuts across the fields both philosophically organizationally and methodologically By covering a comprehensive range of research approaches and methodologies the handbook gives early career researchers what they need to know in order to decide what particular methods can offer for various educational research contexts fields An extensive overview includes concrete examples of different kinds of research not limited for example to teaching and learning examples as present in the Anglo Saxon tradition but including as well what in the German Continental tradition is labelled *pädagogisch* examples from child rearing and other contexts of non formal education with full description and explanation of why these were chosen in particular circumstances and reflection on the wisdom or otherwise of the choice combined in each case with

consideration of the role of interpretation in the process The handbook includes examples of a large number of methods traditionally classified as qualitative interpretive and quantitative used across the area of the study of education Examples are drawn from across the globe thus exemplifying the different opportunities and constraints that educational research has to confront in different societies Immigration in the Circumpolar North Nafisa Yeasmin,Waliul Hasanat,Jan Brzozowski,Stefan Kirchner,2020-06-04 Immigration in the Circumpolar North Integration and Resilience explores interconnected issues of integration and resilience among both immigrants and host communities in the Arctic region It examines the factors that inhibit or enable the success of immigrants to the Arctic and the role of territoriality in the process of integration This book showcases a variety of perspectives on circumpolar immigration and includes insights from eight Arctic countries as well as thirteen observer countries such as China India Singapore Poland Germany France and Japan It considers the solidarities and engagements of indigenous and other local peoples with the new coming immigrants and refugees and the impact of immigration on the economic and societal life in the Circumpolar Arctic The book will be of interest to researchers teachers professors policymakers and others interested in migration issues Arctic issues international relations law and economic integration
