Masters of the Post Duncan Campbell-Smith, 2011-11-03 The origins of the Post Office go back to the early years of the Tudor monarchy Brian Tuke a former King's Bailiff in Sandwich was acknowledged as the first Master of the Posts by Cardinal Wolsey in 1512 and went on to build up a network of postmasters across England for Henry VIII Over the following five hundred years the Royal Mail expanded to an unimaginable degree to become the largest employer in the country and the face of the British state for most people in their everyday lives But it also faced the demands of an increasingly commercial marketplace With the election of Margaret Thatcher in 1979 the possibility of privatising the Royal Mail has prompted passionate arguments and has added immeasurably to the difficulties of running it In charting the whole of this extraordinary story Duncan Campbell Smith recounts a series of remarkable tales including how postal engineers built the first programmable computer for the wartime code breakers of Bletchley Park and how the Royal Mail managed to successfully continue delivering post to the front lines during two world wars but also how they failed to avert the Great Train Robbery of 1963 He brings to life many of the dominant personalities in the Royal Mail's history from Rowland Hill who imposed a uniform penny post and set the great Victorian expansion on its way to Tony Benn who championed the modernisation of the service in the 1960s and Tom Jackson who led the postal workers biggest union through fifteen frequently stormy years up to 1982 This is the first complete history of the Royal Mail up to the present day based on its comprehensive archives and including the first detailed account of the past half century of Britain's postal history made possible by privileged access to confidential records Today's debate over the future of the Royal Mail is shown to be just the latest chapter in a centuries old conflict between its roles raising revenue and serving the public Will its employees remain like Brian Tuke's postmasters servants of the Crown This book could hardly appear at a more timely moment **The**

Forty Years at the Post-office Frederick Ebenezer Baines, 1895

Writing the Stage Coach Nation Ruth Livesey, 2016-09-08

Why is it that so many of the best loved novels of the Victorian era take place not in the steam powered railway present in which they were published but in the very recent past? Most works by Dickens, Brontë, Eliot and Hardy set action neither in the present nor in a definitively historical epoch but rather in a just past of collective memory, a vanishing but still tangible world moving by stage and mail coach. It is easy to overlook the fact that Jane Eyre, Bleak House and Middlemarch, for example, are in this sense historical novels recreating places and times that are just slipping from the horizon of here and now. Ruth Livesey brings to the surface the historical consciousness of such novels of the just past and explores how they convey an idea of a national belonging that can be experienced through a sense of local place. The journey by public coach had long been an analogy for the form of the novel as it took shape in the eighteenth century: smooth engineered roads and the rapid circulation of print was one means by which Britain was reimagined as a modern, peaceable and communicative nation in the aftermath of the Napoleonic wars. But by the later 1840s the end of the stage coach was assured and that made it a highly charged figure of a lost national modernity. In its halts, relays, stops at inns and crossing points, the stage and mail coach system offered a different experience of mobility and being in place, passages of flight and anchoring points from the vectors of the railway that radiated out from industrial and urban centres. This book opens by examining the writing of the stage coach nation in Walter Scott's fiction and in the work of the radical journalists William Hazlitt and William Cobbett. Livesey suggests that in turning to the just past of the stage coach imaginary, later novels by Dickens, Brontë and Eliot reach out to the possibility of a nation knitted together by the affect of strongly felt local belonging. This vision is of a communicative nation at its liveliest when the smooth passage of characters and words are interrupted and upset, delivering readers and protagonists to local places thick with the presence of history.

Police control systems in Britain, 1775-1975 Chris Williams, 2015-11-01

During the last two centuries the job of policing in Britain has been transformed several times. This book analyses the ways that police institutions have controlled the individual constable on the front line. The eighteenth century constable was an independent artisan; his successor in the Metropolitan Police and other new forces

was ferociously disciplined and closely monitored Police have been controlled by a variety of different practices ranging from direct day to day input from the community through bureaucratic systems built around exacting codes of rules to the real time control of officers via radio and latterly the use of centralised computer systems to deliver key information Police forces became pioneers in the adoption of many technologies including telegraphs telephones office equipment radio and computers and this book explains why and how this happened considering the role of national security in the adoption of many of these innovations It will be of use to a range of disciplines including history criminology and science and technology studies
