The Formation of the Child in Early Modern Spain Grace E. Coolidge,2016-03-16 Drawing on history literature and art to explore childhood in early modern Spain the contributors to this collection argue that early modern Spaniards conceptualized childhood as a distinct and discrete stage in life which necessitated special care and concern The volume contrasts the didactic use of art and literature with historical accounts of actual children and analyzes children in a wide range of contexts including the royal court the noble family and orphanages The volume explores several interrelated questions that challenge both scholars of Spain and scholars specializing in childhood How did early modern Spaniards perceive childhood In what framework literary artistic did they think about their children and how did they visualize those children s roles within the family and society How do gender and literary genres intersect with this concept of childhood How did ideas about childhood shape parenting parents and adult life in early modern Spain How did theories about children and childhood interact with the actual experiences of children and their parents The group of international scholars contributing to this book have developed a variety of creative interdisciplinary approaches to uncover children s lives the role of children within the larger family adult perceptions of childhood images of children and childhood in art and literature and the ways in which children and childhood were vulnerable and in need of protection Studying children uncovers previously hidden aspects of Spanish history and allows the contributors to analyze the ideals and goals of Spanish culture the inner dynamics of the Habsburg court and the vulnerabilities and weaknesses that Spanish society fought to overcome *Telepediatrics: Telemedicine and Child Health*

Medicine and Healing Practices in Ancient Egypt Rosalie David, Roger Forshaw, 2023-12-01 Medicine and Healing Practices in Ancient Egypt provides a new perspective on healthcare and healing treatments in Egypt from the Predynastic to the Roman periods Rather than concentrating exclusively on diseases and medical conditions as evidenced in ancient sources it provides a people focused perspective asking what it was like to be ill or disabled in this society Who were the healers To what extent did disease occurrence and treatment reflect individual social status As well as geographical environmental and dietary factors which undoubtedly affected general health some groups were prone to specific hazards These are discussed in detail including soldiers experience of trauma wounds and exposure to epidemics and conditions blindness sand pneumoconiosis trauma and limb amputations resulting from working conditions at building and other sites Methods of diagnosis and treatment were derived from special concepts about disease and medical ethics These are explored as well as the individual contributions and

professional interactions of various groups of healers and carers Medical training and practice occurred in various locations including temples and battlefields these are described as well as the treatments and equipment that were available Ancient writers generally praised the Egyptian healers knowledge expertise and professional relationship with their patients A brief comparison is drawn between this approach and those prevailing elsewhere in Mesopotamia Greece and Rome Finally Egypt's legacy transmitted through Greek Roman and Arabic sources is confirmed as the source of some principles and practices still found in modern Western medicine Combining information from the latest studies on human remains and the authors biomedical research this book brings the subject up to date enabling a wide readership to access often scattered information in a fascinating synthesis

Playhouses and Privilege Abigail A. Van Slyck, 2025-02-11 Examining playhouses of the super rich to understand how architecture contributed to the construction of elite identity and modern childhood *Playhouses and Privilege* explores children's playhouses built on British and American estates between the 1850s and the mid 1930s Different from the prefabricated buildings that later populated suburban backyards these playhouses were often fully functional cottages designed by well known architects for British royalty American industrialists and Hollywood stars As Abigail A Van Slyck shows these buildings were more than extravagant spaces to cultivate children's imaginations and fantasy lives Reviewing a rich archive that includes extant buildings site plans family photographs baby books and intimate household correspondence Van Slyck demonstrates that these structures were tools of social reproduction shaped by elite parents attitudes toward child rearing education and class privilege Recognizing playhouses as stages for the purposeful performance of upper class identity she illuminates their importance in influencing children to internalize gendered codes of conduct as they enacted rituals of hospitality and learned how to supervise servants

From Queen Victoria and Prince Albert's Swiss Cottage built on their Osborne estate in 1853 to the children's cottage constructed on the grounds of Cornelius Vanderbilt's Newport mansion in 1886 and from the miniature bungalow commissioned in 1926 for the Dodge Brothers Motor Company heiress to the corporate sponsored glass block playhouse given to Shirley Temple in 1936 Van Slyck surveys a variety of playhouses and their milieus to trace the evolution of elite childhood and the broader social practices of wealth. Playhouses and Privilege makes clear that far from being frivolous playhouses were carefully planned architectural manifestations of adult concerns integral to the reproduction of class privilege.

Oesophageal Atresia A. W. Auld, Spencer W. Beasley, N. A. Myers, 2013-11-11 This book on oesophageal atresia and tracheo oesophageal fistula sets out to describe all aspects of a congenital anomaly which has been described as the epitome of modern surgery and the *raison d'être* of paediatric surgery. Although the literature contains references to the survival of one baby with oesophageal atresia without fistula who was born in 1935, the major component of the oesophageal atresia story concerns the most frequent anomaly, namely oesophageal atresia with a distal tracheo oesophageal fistula. The first long term survivals of babies born with this anomaly were in 1939, it is appropriate therefore that this book should be compiled 50 years later. Surgery and neonatal care have made striking advances during this half century and nowhere is this more obvious than in the field of neonatal surgery. But the care of the baby with oesophageal atresia requires more than a surgeon and a neonatologist and our experience has shown the need for a multidisciplinary approach involving anaesthetists, intensive care therapists, thoracic physicians, general paediatricians, cardiologists and cardiac surgeons, orthopaedic surgeons, radiologists, nephrologists and geneticists. The involvement of representatives of all of these disciplines is evident in the pages that follow and in the list of contributors; however, a central theme in the care of patients with oesophageal atresia is that they and their families are able to identify with one doctor who has the ultimate

responsibility for patient care and the counselling of the family
