In their book titled: *Money, Banking, and Financial Markets*, authors Stephen G. Cecchetti (an economic advisor and the chairman of the Monetary and Economic Department at the Bank for International Settlements), and Kermit L. Schoenholtz (a professor of New York University, the Economic Department of the Leonard N. Stern School of Business), clearly and substantially showed the basic elements of the financial system and investigated the key effects it has on a broader social community.

The second chapter analyzes money, both in theory and in practice. In order to understand the essence of the function of money in a national economy, a shorter analysis has been
