Shades Of Citizenship:

Shades of Citizenship Melissa Nobles, 2000 This book explores the politics of race censuses and citizenship drawing on the complex history of questions about race in the U S and Brazilian censuses It reconstructs the history of racial categorization in American and Brazilian censuses from each country s first census in the eighteenth and nineteenth centuries up through the 2000 census It sharply challenges certain presumptions that guide scholarly and popular studies notably that census bureaus are or are designed to be innocent bystanders in the arena of politics and that racial data are innocuous demographic data Using previously overlooked historical sources the book demonstrates that counting by race has always been a fundamentally political process shaping in important ways the experiences and meanings of citizenship This counting has also helped to create and to further ideas about race itself The author argues that far from being mere producers of racial statistics American and Brazilian censuses have been the ultimate insiders with respect to racial politics For most of their histories American and Brazilian censuses were tightly controlled by state officials social scientists and politicians Over the past thirty years in the United States and the past twenty years in Brazil however certain groups within civil society have organized and lobbied to alter the methods of racial categorization This book analyzes both the attempt of America s multiracial movement to have a multiracial category added to the U S census and the attempt by Brazil s black movement to include racial terminology in census forms Because of these efforts census bureau officials in the United States and Brazil today work within political and institutional constraints unknown to their predecessors Categorization has become as much a bottom up process as a top down one

Race and Nation Paul Spickard, 2005-07-08 *Race and Nation* is the first book to compare the racial and ethnic systems that have developed around the world It is the creation of nineteen scholars who are experts on locations as far flung as China Jamaica Eritrea Brazil Germany Punjab and South Africa The contributing historians sociologists anthropologists political scientists and scholars of literary and cultural studies have engaged in an ongoing conversation honing a common set of questions that dig to the heart of racial and ethnic groups and systems Guided by those questions they have created the first book that explores the similarities differences and the relationships among the ways that race and ethnicity have worked in the modern world In so doing they have created a model for how to write world history that is detailed in its expertise yet also manages broad comparisons

Biocitizenship Kelly E. Happe, Jenell Johnson, Marina Levina, 2018-08-21 A groundbreaking exploration of biocitizenship Citizenship has a long complex relationship with the body In recent years developments in biomedicine and biotechnology as well as a number of political initiatives grassroots efforts and public policies have given rise to new ways in which bodies shape the idea and practices of citizenship or what has been called biocitizenship This book the first collection of essays on the topic of biocitizenship aims to examine biocitizenship as a mode of political action and expand readers understanding of biopolitics Organized into four distinct sections covering topics including AIDS drug testing on the mentally ill and force feeding prisoners *Biocitizenship*

delves deep into the relationship between private and public identity politics and power Composed of pieces by leading scholars from a wide variety of disciplines Biocitizenship offers a clear and comprehensive discussion on biocitizenship biopolitics and groups that may be affected by this ever growing dialogue Authors address issues familiar to biopolitics scholarship such as gender sexuality class race and immigration but also consider unique objects of study such as incubators dead bodies and corporations Biocitizenship seeks to question who may count as a biological citizen and for what reasons an essential topic in an age in which the body and its health provide the conditions necessary for political recognition and agency

Race, Ethnicity and Education David Scott, 2003-12-01 *Original Sins* Eve L. Ewing, 2025-02-11 A fascinating and eye opening look at how American schools have helped build and reinforce an infrastructure of racial inequality a must read for every American parent and educator Esquire Most Anticipated Books of 2025 Though the argument of this book is bleak it illuminates a path for a more just future that is nothing short of dazzling Oprah Daily Most Anticipated Books of 2025 This book will transform the way you see this country Michelle Alexander author of *The New Jim Crow* If all children could just get an education the logic goes they would have the same opportunities later in life But this historical tour de force makes it clear that the opposite is true The U S school system has played an instrumental role in creating and upholding racial hierarchies preparing children to expect unequal treatment throughout their lives In *Original Sins* Ewing demonstrates that our schools were designed to propagate the idea of white intellectual superiority to civilize Native students and to prepare Black students for menial labor Education was not an afterthought for the Founding Fathers it was envisioned by Thomas Jefferson as an institution that would fortify the country's racial hierarchy Ewing argues that these dynamics persist in a curriculum that continues to minimize the horrors of American history The most insidious aspects of this system fall below the radar in the forms of standardized testing academic tracking disciplinary policies and uneven access to resources By demonstrating that it's in the DNA of American schools to serve as an effective and underacknowledged mechanism maintaining inequality in this country today Ewing makes the case that we need a profound reevaluation of what schools are supposed to do and for whom This book will change the way people understand the place we send our children for eight hours a day

Navigating Nationality Johannes Kögel, 2024-01-18 In recounting their migration journey references to nationality pervade the narratives of Zimbabweans in South Africa Given the challenges many migrants confront based on their nationality this presents a seeming paradox This qualitative interview study conducted with Zimbabwean migrants in two areas of Cape Town Observatory and Dunoon aims to elucidate the nuances of national self descriptions in a demanding environment Identifying as Zimbabwean serves as a sanctuary and a retreat where alternative identifications often prove transient embracing Zimbabweanness fosters an affirmative and positive self perception surpassing the limitations of other collective self descriptions Rather than pre emptively characterizing a nationalist demeanour the articulation of national self description emerges as a strategic tool to navigate experiences of hostility and discrimination while also asserting legitimate

claims to equal opportunities In this way nationality takes a trajectory that diverges from conventional notions of nationality and the ones of the nation state or citizenship as per Northern theory contributing to alternative conceptualizations within the framework of the Global South

How Cancer Crossed the Color Line Keith Wailoo, 2011-02-01 In the course of the 20th century cancer went from being perceived as a white woman's nemesis to a democratic disease to a fearsome threat in communities of color Drawing on film and fiction on medical and epidemiological evidence and on patients accounts Keith Wailoo tracks this transformation in cancer awareness revealing how not only awareness but cancer prevention treatment and survival have all been refracted through the lens of race Spanning more than a century the book offers a sweeping account of the forces that simultaneously defined cancer as an intensely individualized and personal experience linked to whites often categorizing people across the color line as racial types lacking similar personal dimensions Wailoo describes how theories of risk evolved with changes in women's roles with African American and new immigrant migration trends with the growth of federal cancer surveillance and with diagnostic advances racial protest and contemporary health activism The book examines such powerful and transformative social developments as the mass black migration from rural south to urban north in the 1920s and 1930s the World War II experience at home and on the war front and the quest for civil rights and equality in health in the 1950s and 60s It also explores recent controversies that illuminate the diversity of cancer challenges in America such as the high cancer rates among privileged women in Marin County California the heavy toll of prostate cancer among black men and the questions about why Vietnamese American women's cervical cancer rates are so high A pioneering study *How Cancer Crossed the Color Line* gracefully documents how race and gender became central motifs in the birth of cancer awareness how patterns and perceptions changed over time and how the war on cancer continues to be waged along the color line

The Politics of Identity in Latin American Censuses Luis F. Angosto-Ferrández, Sabine Kradolfer, 2017-10-02 *The Politics of Identity in Latin American Censuses* contributes new and original perspectives to existing discussions about the shaping of multiculturalist ideology in Latin America its interweaving with the cultural politics of neoliberalism and the relation between ethnic identification resurgence and economic globalization Scrutinising national censuses across the continent the studies included in this volume reveal clear relationships between censuses nation building and government projects but also strong and determinant connections between domestic and supra national spheres The contributors to this volume open provocative avenues of research on Latin American societies by demonstrating how in the realm of identity politics supra national institutions and normativity socialise national census bureaus in a way that largely annuls ideological differences between regional governments This book was originally published as a special issue of the *Journal of Iberian and Latin American Research*
