**Shadows of Hiroshima** Wilfred Burchett, 2025-08-05 An Australian journalist the first westerner to enter Hiroshima after the nuclear bomb was dropped recounts his impressions of the decimated city and the treatment of the survivors I Write This As A Warning To The World This headline in the London Daily Express on 5 September 1945 was the first cry of alarm that the age of threatening nuclear catastrophe had dawned Wilfred Burchett who became the most famous radical journalist of his generation wrote It and the accompanying story in the ruins of Hiroshima He was the first Westerner of any kind to enter the city after the atomic blast The story of his efforts to reach Hiroshima is retold in this dramatic book It shows how the politics of nuclear confusion was inaugurated before the ashes of the city had cooled Burchett details the attempts by the US government to deny the effects of radiation sickness described in his reports He reveals the pressure to silence him through deportation from Japan and in a telling analysis he uncovers once more the political calculations that led Truman to drop the bomb The other major character in this book Is the population of Hiroshima itself The survivors of the attack and their children have lived with the legacy of nuclear war for two generations The author a regular visitor to the city recounts their experience of callous treatment medical neglect social isolation and eventual reinvigoration through the Japanese peace movement

*Hiroshima* Richard Tames, 2006 Find out why Japan was the first target for an atomic bomb This book focuses on the impact of the bomb on Hiroshima analyzing how it came about describing it and discussing its consequences on history Investigate the timeline to understand crucial dates surrounding the bombing of Hiroshima Read the debate section so you can consider the arguments and weigh the evidence about its role in history Clear photographs maps contemporary views a glossary and tips for future research are included to help you to understand the importance of this turning point in history

*Shadows of Nagasaki* Chad R. Diehl, 2024-01-02 A critical introduction to how the Nagasaki atomic bombing has been remembered especially in contrast to that of Hiroshima In the decades following the atomic bombing of Nagasaki on August 9 1945 the city s residents processed their trauma and formed narratives of the destruction and reconstruction in ways that reflected their regional history and social makeup In doing so they created a multi layered urban identity as an atomic bombed city that differed markedly from Hiroshima s image *Shadows of Nagasaki* traces how Nagasaki s trauma history and memory of the bombing manifested through some of the city s many post atomic memoryscapes such as literature religious discourse art historical landmarks commemorative spaces and architecture In addition the book pays particular attention to how the city s history of international culture exemplified best perhaps by the region s Christian especially Catholic past informed its response to the atomic trauma and shaped its postwar urban identity Key historical actors in the volume s chapters include writers Japanese Catholic leaders atomic bombing survivors known as hibakusha municipal officials American occupation personnel peace activists artists and architects The story of how these diverse groups of people processed and participated in the discourse surrounding the legacies of Nagasaki s bombing shows how regional history

culture and politics rather than national ones become the most influential factors shaping narratives of destruction and reconstruction after mass trauma In turn and especially in the case of urban destruction new identities emerge and old ones are rekindled not to serve national politics or social interests but to bolster narratives that reflect local circumstances

**Hiroshima's Shadow** Kai Bird, Lawrence Lifschultz, 1998 Writings on the denial of history and the Smithsonian controversy Cover      **Shadows of Being** Marko Uršič, 2019-01-15 This book is a study of the phenomena of shadows meant in a broader sense as symbolic forms The shadow is a less real surface replica of some more real form From the Platonic point of view empirical objects are shadows of ideas while from the modern natural point of view shadows are seen and conceived primarily as weaker replicas of bodies which give evidence of their material reality In the first three essays here several topics from the Ancient Egypt and Greece to modern arts and sciences are considered while in the fourth essay the contemporary virtual reality cyber technology and the internet as our parallel shadow world are discussed from the philosophical point of view The main and innovative point of this book is the connection between the meaning of shadows in philosophy and art on the one hand and their role in modern science and technology on the other The book will appeal to a wide span of readers from academic circles students and artists to the general reader interested in the humanities especially in philosophy and art      **Dismantlings** Matt Tierney, 2019-12-15 For the master s tools the poet Audre Lorde wrote will never dismantle the master s house Dismantlings is a study of literary political and philosophical critiques of the utopian claims about technology in the Long Seventies the decade and a half before 1980 Following Alice Hilton s 1963 admonition that the coming years would bring humanity to a crossroads machines for HUMAN BEINGS or human beings for THE MACHINE Matt Tierney explores wide ranging ideas from science fiction avant garde literatures feminist and anti racist activism and indigenous eco philosophy that may yet challenge machines of war control and oppression Dismantlings opposes the language of technological idealism with radical thought of the Long Seventies from Lorde and Hilton to Samuel R Delany and Ursula K Le Guin to Huey P Newton John Mohawk and many others This counter lexicon retrieves seven terms for the contemporary critique of technology Luddism a verbal and material combat against exploitative machines communion a kind of togetherness that stands apart from communication networks cyberculture a historical conjunction of automation with racist and militarist machines distortion a transformative mode of reading and writing revolutionary suicide a willful submission to the risk of political engagement liberation technology a synthesis of appropriate technology and liberation theology and thanatopography a mapping of planetary technological ethics after Auschwitz and Hiroshima Dismantlings restores revolutionary language of the radical Long Seventies for reuse in the digital present against emergent technologies of exploitation subjugation and death      **The Unfinished Atomic Bomb** Cassandra Atherton, David Lowe, Alyson Miller, 2017-12-26 In its diversity of perspectives The Unfinished Atomic Bomb Shadows and Reflections is testament to the ways in which contemplations of the A bomb are endlessly shifting rarely fixed on the same point or perspective The

compilation of this book is significant in this regard offering Japanese American Australian and European perspectives In doing so the essays here represent a complex series of interpretations of the bombing of Hiroshima and its implications both for history and for the present day From Kuznick s extensive biographical account of the Hiroshima bomb pilot Paul Tibbets and contentious questions about the moral and strategic efficacy of dropping the A bomb and how that has resonated through time to Jacobs reflections on the different ways in which Hiroshima and its memorialization are experienced today each chapter considers how this moment in time emerges persistently in public and cultural consciousness The discussions here are often difficult sometimes controversial and at times oppositional reflecting the characteristics of A bomb scholarship more broadly The aim is to explore the various ways in which Hiroshima is remembered but also to consider the ongoing legacy and impact of atomic warfare the reverberations of which remain powerfully felt     Shadows Peter J.

**The Work of Forgetting** Stephane Symons,2018-12-14 For over fifty years the concept of memory has played a crucial role in a large number of academic and societal debates *The Work of Forgetting Or How Can We Make the Future Possible* draws attention to the limits of the academic field of memory studies It argues that the faculty of memory offers an inadequate response to the challenges of the present The book sets up a dialogue between the philosophies of forgetting that underlie the writings of Friedrich Nietzsche Walter Benjamin and Gilles Deleuze and the philosophies of memory that inform the work of Sigmund Freud Martin Heidegger and Hannah Arendt It builds on the idea that history is inseparable from a type of transience that cannot be counter acted by the preserving work of memory and develops a new understanding of the phenomenon of forgetting in which the passage of time is asserted in thought and thus made productive
