

MARTHA MOULSWORTH

"My Name Was Martha": A Renaissance Woman's Autobiographical Poem. Martha Moulsworth

Martha Moulsworth is known as a writer from a single autobiographical poem which is analyzed from feminist perspective. The fact that it is by a woman adds to its importance. Her poem also suggests a highly complex attitude toward her status in a rigidly patriarchal society, including her relations with her God, her father, and her three successive husbands.

Martha opens her chronological account of her life by presenting herself as part of the male academic tradition when she elaborates on the education that she received from her father.

Chapter 2 talks about of the various roles and experiences of Renaissance women. This chapter focuses on women's roles as daughters, wives, and widows, and it also looks at the status and limits of women's education during the early modern period. Chapter 3 attempts to view the poem specifically as a piece of autobiographical writing, since Moulsworth's work seems important as one of the earliest examples of such writing by anyone in England, male or female. Finally, Chapter 4 tries to view the poem in light of recent feminist theories about the nature and features of writing by women.

Viewing the poet from a modern feminist perspective highlights several aspects of the enduring female experience and thus may also help us further comprehend the evolution of women's social roles. Moulsworth relates her experiences as a young gentlewoman whose father taught her not "godlie pietie" – modestly and sobriety – all of these being traits that are in tune with the contemporary ideals of virtuous femininity. The father whom Martha loved so much seems to be partly creation of her imagination. The identification of her with father makes possible her entry into the patriarchal symbolic order. In her work, it can be seen that Martha mentions only the name of father and not of mother.
