pre history of five twentieth century inventions which have transformed our lives Gavin Weightman reveals a fantastic cast of scientists and inspired amateurs whose ingenuity has given us the airplane television bar code personal computer and mobile phone Not one of these inventions can be attributed to a lone genius who experiences a moment of inspiration Nearly all innovations exist in the imagination before they are finally made to work by the hard graft of inventors who draw on the

discoveries of others While the discoveries of scientists have provided vital knowledge which has made innovation possible it is a revelation of Weightman s study that it is more often than not the amateur who enjoys the eureka moment when an invention works for the first time Filled with fascinating stories of struggle rivalry and the ingenuity of both famous inventors and hundreds of forgotten people Weightman s captivating work is a triumph of storytelling that offers a fresh take on the making of our modern world Biographical Dictionary of the History of Technology Lance Day,Ian McNeil,2002-09-11 This Biographical Dictionary seeks to put the world of technology in the context of those who have made the most important contribution to it For the first time information has been gathered on the people who have made the most significant advances in technology From ancient times to the present day the major inventors discoverers and entrepreneurs from around the world are profiled and their contribution to society explained and assessed Structure The Dictionary presents descriptive and analytical biographies of its subjects in alphabetical order for ease of reference Each entry provides detailed information on the individual s life work and relevance to their particular field in the first part of the entry the information will include the dates and places of the subject s birth and death together with their nationality and their field of activity in the main body of the entry there follows an account of their principal achievements and their significance in the history of technology along with full details of appointments and honours finally an annotated bibliography will direct the reader to the subject s principal writings and publications and to the most important secondary works which the reader can consult for further information Special Features The first work in existence to examine technologists in detail Contains over 1 500 entries giving detailed information Extensive cross references enable the reader to compare subjects and build up a picture of technological advance Figures drawn from fields such as Aeronautics Telecommunications Architecture Photography and Textiles **Electrically Conductive Adhesives** Rajesh Gomatam,Kash L. A Fabricated Mexican Rick P. Rivera,1995-06-30 Rick Rivera s first novel charts the sometimes hilarious sometimes bitter sweet saga of growing up in two cultures with the American Dream as a guiding light In a series of poignant vignettes the reader follows Ricky Coronado s search for identity a search made more difficult by the specter of his father s suicide and the pressures placed upon him by his strong willed mother The narrator is a quiet but mischievous boy who retells the antics of his close knit and often eccentric family The amusing adventures of the clan include his stepfather s proposal to his mother visits to the psychiatrist and the comic misconception of Catholic catechism by well meaning nuns In

his journey of self discovery that harkens to the pioneer work of Oscar Zeta Acosta's Brown Buffalo adventures Ricky comes to the same solution that generations of hyphenated Americans have reached the painful but rewarding creation of a new self that combines elements of both ethnic realities

Britain's War Machine David Edgerton, 2011-09-09 The familiar image of the British in the Second World War is that of the plucky underdog taking on German might David Edgerton's bold compelling new history shows the conflict in a new light with Britain as a very wealthy country formidable in arms ruthless in pursuit of its interests and in command of a global production system Rather than belittled by a Nazi behemoth Britain arguably had the world's most advanced mechanized forces It had not only a great empire but allies large and small Edgerton shows that Britain fought on many fronts and its many home fronts kept it exceptionally well supplied with weapons food and oil allowing it to mobilize to an extraordinary extent It created and deployed a vast empire of machines from the humble tramp steamer to the battleship from the rifle to the tank made in colossal factories the world over Scientists and engineers invented new weapons encouraged by a government and prime minister enthusiastic about the latest technologies The British indeed Churchillian vision of war and modernity was challenged by repeated defeat at the hands of less well equipped enemies Yet the end result was a vindication of this vision Like the United States a powerful Britain won a cheap victory while others paid a great price Putting resources machines and experts at the heart of a global rather than merely imperial story Britain's War Machine demolishes timeworn myths about wartime Britain and gives us a groundbreaking and often unsettling picture of a great power in action
