## How does it work?

We monitor your SSL certificates and sends you an email when they are about to expire. You can add as many domains as you want, and come to your dashboard to review them.

[Track your own certificates](#)

## Why should I use it?

An expired SSL certificate can cause a lot of problems for your users. Their web browser will warn them that your site is not secure, and they might not be able to access it at all. I created **Watch my SSL** because I was tired of forgetting to renew my SSL certificates. Sure, your browser will warn you when you visit a site with an expired certificate, but by that time it's too late.
