

Bridging the gap between clinical and critical sociological perspectives in dementia

Noel Collins  & James Rupert Fletcher

ARTICLE

SUMMARY

There is a widening gap between the medical model of dementia and critical sociological perspectives of the condition. Given the relative failure of reductionism in dementia and its rising prevalence, consideration of the utility of these critical viewpoints is warranted. This article considers how these ideas, which challenge some prevailing assumptions about dementia, can be meaningfully applied in conjunction, rather than in competition, with conventional clinical ideas. To illustrate this, current perspectives on selfhood, biopolitics, citizenship and post-humanism are discussed. This article may also help to articulate sociologically oriented approaches already used by some clinicians and legitimise the time and attention needed to explore and deliver these. We support the view that dementia is an episteme in the making and that different traditions and dispositions can fruitfully collide to enliven interdisciplinary conversations about dementia and dementia care.

KEYWORDS

Critical psychiatry; sociology; gerontology; dementia; citizenship.

LEARNING OBJECTIVES

After reading this article you will be able to:

- explain how different models of the self in dementia suggest its resilience and may help in diagnostic counselling
- explain how citizenship is influenced by everyday activities and material objects
- consider dementia from a post-humanist perspective, offering some clinical initiatives, but also the possibility of iatrogenic harm.

The rising prevalence of dementia (from 57.4 million worldwide in 2019 to a predicted 152.8 million in 2050) due to population ageing poses a wide range of social and health challenges (Nichols 2022). Increasing dissatisfaction with the medical model's inability to account for the wide variation

in the individual experience of dementia has led to a proliferation of alternative theories of dementia arising from sociological and critical theory viewpoints. Some have accused the medical model of dehumanising people with dementia and failing to deliver treatments with substantive clinical effects (Fletcher 2023). In this article we consider how some of these perspectives, which challenge many prevailing medical assumptions about dementia, can be used alongside more traditional clinical ideas to improve the experience of diagnosis and post-diagnostic care for people with dementia. Although the use of 'dementia' as a singular umbrella term is almost as nonsensical as 'cancer' (given the multitude of aetiologies and varied individual experiences that it subsumes), it is used here for heuristic purposes. This article is most pertinent to late-onset early- to mid-stage dementia and may have less applicability to the challenges faced by younger people with the condition or those in more advanced or terminal phases of the condition. Finally, we introduce clinicians to some conceptual and practical implications of contemporary social science. This is valuable but, nonetheless, we must remember that most dementia care is 'informal', provided by family members and taking place beyond the clinic.

Acknowledging current limitations

The unstable nosology of dementia

Ever since a group of influential German physicians (Alzheimer, Pick, Krapelin et al) reframed senility as a neurodegenerative disease over a century ago, the neurocognitive positioning of dementia has been contentious (Herrup 2021). This relates, in part, to the long-standing pathophysiological, cognitive and epidemiological challenges of differentiating the pathological and the normal to define a categorical dementia syndrome (Brayne 2007). The nosology of dementia remains unstable, with blurred and dynamic distinctions between aetiological subtypes (Morris 2000) and ever-changing diagnostic criteria, with limbic-predominant age-associated TDP-43 encephalopathy (LATE), vascular

Posthuman Perspectives in Health Sociology Kim McLeod, Simone Fullagar, 2024-08-16 This book shows the potential of

posthuman thinking for rethinking health care experiences subjects and interventions It explores a range of posthuman dilemmas across diverse health issues as contributors grapple with the ethical ontological and epistemological relations of knowing and doing health The volume problematizes the rational agentic individual as the key driver of health related action and experience Contributors move beyond long held humanist assumptions about health illness and well being and attune theoretically and methodologically to the entangled relations or ecologies that instantiate realities They reimagine how care practices and healthcare experiences materialise through human non human relationality as biosocial environments Chapters explore and articulate the agency of more than human entities in health related processes to shed new light on health interventions evaluations and health policy Taken together the book highlights that although posthumanism enables health sociologists to progress particular agendas it is essential to further problematise the posthuman decentring of the human by bringing sustained attention to bear on the ethical and political implications of this approach to knowledge making in health This field defining collection consolidates and builds momentum in the burgeoning area of posthuman thinking in health It will appeal to scholars and researchers seeking to understand health as a relational achievement better This book was originally published as a special issue of Health Sociology Review

Introduction to Interdisciplinary Studies Allen F. Repko, Rick Szostak, Michelle Phillips Buchberger, 2019-10-30 Completely updated to reflect advances in the literature on research learning and assessment Introduction to Interdisciplinary Studies is a comprehensive and practical overview of the roles and evolution of both disciplines and interdisciplinarity within the academy

Power and Conflict Between Doctors and Nurses Maureen A. Coombs, 2004-02-24 Through observations in three intensive care units this book draws on the reality of practice to explore how nurses and doctors work in intensive care settings It examines the power held by the competing knowledge bases the roles of the different professions the decision making process the sources of conflict the need for change Drawing together sociological theories and clinical practice Power and Conflict Between Doctors and Nurses explores the role of nurses in delivering contemporary health care It makes a strong case for interdisciplinary working and is particularly timely when health care policy is challenging work boundaries in health care

Critical Perspectives on Safeguarding Children Karen Broadhurst, Chris Grover, Janet Jamieson, 2009-08-20 A critical and evidence based review of current and future child protection policy and practice Provides evidence based perspective with an up to date overview of policy and practice Covers several disciplinary boundaries Goes beyond mere description to enable engagement in critical analysis of various policy areas as they relate to children and families

Emotions in Social Life Gillian Bendelow, Simon J Williams, 2002-09-11 The development of a sociology of emotions is crucial to our understanding of social life as they hold the key to our understanding of social processes and sociological investigation First published in 1997 Emotions in Social Life consolidates the sociology of emotions as a legitimate and viable field of enquiry It provides a comprehensive assessment of the sociology of emotions using work from scholars of international stature as well as newer writers in the field It presents

new empirical research in conjunction with innovative and challenging theoretical material and will be essential reading for students of sociology health psychology anthropology and gender studies Feminist Theories and Concepts in Healthcare Kay Aranda, 2017-09-10 Feminist theories and research approaches are committed to generating relevant morally accountable knowledge and understanding as well promoting social and political change Through them we have the potential to understand more fully the urgent global health concerns that individuals families and communities face on a daily basis This unique text provides students across a range of health care disciplines with a clear and accessible introduction to feminist theory and conceptual frameworks as well as how to apply them to health specific issues With a particular focus on students own qualitative research activities each chapter guides the reader through challenging and sometimes highly contentious theories with clarity and eloquence and demonstrates the ways in which feminist theories and research approaches can be used to help analyse the wide range of contemporary issues encountered by health practitioners daily This is a fascinating read for health science research students and practising health professionals or indeed anyone wishing to learn more about feminist theories and concepts within health care **Health Care & Public Policy** George R. Palmer, Stephanie D. Short, 2000 Critical and Cultural Interactionism Michael Hviid Jacobsen, 2019-03-28 One of the longest standing traditions in sociology interactionism is concerned with studying human interaction and showing how society to a large part is constituted by patterns of interaction In spite of the work of figures such as Robert E Park Everett C Hughes Erving Goffman Herbert Blumer Norman K Denzin and Gary Alan Fine interactionism perhaps owing to its association with the perspective of symbolic interactionism remains something of an odd man out in mainstream sociology This book seeks to rectify this apparent neglect by bringing together critical social theories and microsociological approaches to research thus revealing the critical and cultural potentials in interactionism the chapters arguing that far from being oriented towards the status quo interactionism in fact contains a critical and cultural edge Presenting the latest work from some of the leading figures in interactionist thought to show recent developments in the field and offer an overview of some of the most potent and prominent ideas within critical and cultural criminology Critical and Cultural Interactionism will appeal to scholars of sociology with interests in interactionism social theory research methods and criminology Against Critical Thinking in Health, Social Care and Social Work Tom Grimwood, 2023-09-08 This book stages a provocative dialogue between social work health and social care and contemporary philosophy in order to inform theory and practice in a complex and challenging world Today the social world is marked by deep rooted complexities tensions and challenges Health workers and social workers are constantly reminded to employ critical thinking to navigate this world through their practice But given how many of these challenges pose significant problems for the theories that these subjects have traditionally drawn upon should we now be critical of critical thinking its assumptions its basis and its aspirations itself Arguing that health and social work theory must reconsider its deep rooted assumptions about criticality in order to navigate complex neoliberalism

post truth and the relationship between language and late capitalism it examines how the fusion of theory and practice can re imagine critical thinking for health social care and social work It will be of interest to all scholars students and professionals of social work and health and social care
