The Big Con in Education Dennis Redovich, 2005-07 The Big Con in Education is the shocking exposé that details how public schools are used as convenient scapegoats for social and economic woes woes perpetuated not in schoolyards but in the halls of Congress and in the boardrooms of the Fortune 500 Author Dennis W Redovich debunks leading business and political interests who blame economic problems on an inadequate workforce claiming that schools are not educating children with the life skills needed in the twenty first century Using the United States government's own statistics The Big Con in Education uncovers the lies trumpeted in the media about the serious shortage of skilled workers and the subsequent economic decline It also illustrates a lack of credible rationale to claim that all students need to take higher level courses in academic subjects to prepare to enter the workforce Redovich contends that supply side education and training does not produce high paying jobs any more than does failed supply side economics The Big Con in Education documents the hype propaganda and hypocrisy big business and political propagandists dish out in a war against public education Redovich offers his views on the important facts concerning the reality of the job

The Gendered Impacts of Liberalization Shahra Razavi, 2009-01-13 In the last two decades public policies have reflected a drive for accelerated global economic integration globalization associated with greater economic liberalization The outcomes have been largely disappointing even in the estimate of their designers Rural livelihoods have become more insecure and the expected growth has rarely materialized Insecurity is also etched into the growth of informal economies across the world Yet the economic policy agenda that has been so adverse to many people around the world has also provided new opportunities to some social groups including some low income women In response to widespread discontent with the liberalization agenda more attention is now being given to social policies and governance issues viewed as necessary if globalization is to be tamed and embedded The contributors to this volume address key issues and questions such as whether states have the capacity to remedy the social distress unleashed by liberalization in the absence of any major revision of their macroeconomic policies and whether the proposed social policy reforms can redress gender based inequalities in access to resources and power
