Handbook of nutrition, diet and sleep

Victor R. Preedy, Lan-Anh Le, Vinood B. Patel, 2013-06-02
Emerging literature and research have currently shown that sleep sleep disturbances diet and nutrition are interlinked in numerous ways
For example sleep deprivation alters food intake and snacking behaviour
On the other hand dietary restriction and obesity alter sleep
Specific nutrients such as caffeine and alcohol also affect sleep
Furthermore variations in these relationships differ with respect to age gender and state of health
There is a connection between sleep and disordered nutrition as defined by conditions such as diabetes and metabolic syndrome
This book demonstrates that disruptive sleep patterns can be remedied by appropriate dietary or nutritional changes including the usage of supplements
The contribution of sleep to our daily lives is not yet fully understood but it is clear that its impact should not be underestimated
This handbook discusses the important relationship between diet and nutrition and disruptive or abnormal sleep in the sub clinical or clinical setting
Authorities in the field offer a wide range of scientifically sound perspectives and approaches of the link between sleep nutrition and diet
