The book combines the perspectives of expert scientists, educators, practitioners and policy makers into one of the most extensive and thorough references available for the promotion of physical activity, fitness and health. Written in nontechnical language, *Toward Active Living* includes 41 of the papers presented during the Active Living portion of the 1992 International Conference on Physical Activity, Fitness and Health held in Toronto. The book enables practitioners to apply research based knowledge in the physical activity sciences in their day to day work. *Toward Active Living* is an essential reference that fitness instructors, health fitness administrators, physical educators, students and policy makers will turn to again and again. With previous editions the activities were housed in two separate books, one for elementary teachers and one for middle and secondary teachers. Now all activities are on the accompanying web resource where teachers can sort the activities by standard, grade outcome and skill and then use them on a mobile device or download and print them. Most activities are supported by ready to use reproducible forms such as handouts, assessments, posters and worksheets. Other useful web ancillaries include an instructor guide to help teachers deliver effective lessons, a test package that teachers can use to create various types of tests and quizzes and a presentation package that offers slides with key points and graphics from the book. *Physical Best* meets needs on many levels. For veteran teachers it outlines strategies for emphasizing health related fitness in their existing programs.
