Mortal Minds Gerald M. Woerlee,2010-06-03 With its easy to read and personal style this book provides some intriguing new explanations of the physiology of death and the dying experience Susan Blackmore PhD Author of *Dying to Live* Dying is the last conscious experience undergone by each person But what do the dying experience In the last few decades a good deal of publicity has surrounded people who have been close to death and then reported intense experiences that seem to suggest a supernatural existence beyond death Does the conscious mind somehow continue to exist after the body has passed away *Mortal Minds* answers these questions Dr G M Woerlee explains how the normal functioning of the human body near death can generate beliefs in the reality of the supernatural and life after death An anesthesiologist with more than twenty years of hospital experience Dr Woerlee has been struck over the years by the similarities between the body's symptoms under anesthesia and its reactions near death Among the issues he addresses are the sensations of being disembodied that those near death often describe the perception that mind and body are separate components of existence whether there is such a thing as a soul the physical effects of decreased oxygen to the brain and the visions that the dying sometimes report from rapturous experiences of eternal peace to diabolical dreams While not dismissing near death experiences as mere hallucinations Dr Woerlee is also careful to point out that even powerful psychological impressions by themselves do not constitute scientific proof of life after death Taking this balanced objective stance he succeeds in conveying a better understanding of the dying process and helping us all to realize the nature of these final experiences G M Woerlee Leiden The Netherlands is an anesthesiologist affiliated with the Rijnland Hospital in Leiderdorp The Netherlands and the author of two books on anesthesiology

Hurst, 2025-04-08 How understanding our genetic imperfections can change our view of evolution and enrich what it means to be human If we start with the presumption that evolution is a constantly improving process some aspects of our evolution just do not make sense We have a high rate of genetic diseases for example and much of our DNA seems to be pointless In The Evolution of

Imperfection Laurence Hurst explores our apparently rotten genetic luck Hurst a leading authority on evolution and genetics argues that our evolutionary imperfections proceed directly from two features the difficulties of pregnancy and the fact that historically there are relatively few of us In pregnancy natural selection can favor chromosomes that kill embryos in species including ours that continuously receive resources from the mother Most fertilized eggs don t make it and incompatibilities between the fetus and mother can lead to lethal disorders of pregnancy The historically small population size enhances the role of chance which in turn leads to both accumulation of unnecessary DNA and more mutation So what can save us One answer may lie in genetic medicine which has given us therapies that make killer conditions preventable and even curable Hurst suggests that our seeming imperfections could be the key to a new way to understand evolution itself Looking at circumstances that seem to defy explanation we might come to a richer understanding of how evolution really works and what it means to be human

I AM AN ECHO CHAMBER: THE BASIS OF TRIBALISM Anthony Gribin, 2018-04-08 Americans are becoming increasingly tribalistic It s not just Republicans vs Democrats it s brown vs white college educated vs blue collar folks the coasts vs the midwest gay vs straight rich vs poor believers in science vs non believers facts vs fake news sexual predators vs murderers foreign businesses vs American businesses Trumpists vs never Trumpers Why It s easy and convenient to blame President Trump but he is more a catalyst than a cause of the problem He is one of the factors that are outside of us as human beings as is income inequality immigration racism and advancing technology These exogenous causes of tribalism in their various forms occupy a huge slice of the daily news cycle Most people if presented with the phrase echo chamber will associate it with left or right leaning media networks MSNBC and FOX respectively Each side broadcasts news and opinions over and over that agrees with their slant and ignores or underrepresents views that are opposed And we humans not only passively inhale one sided information we actively seek out news which is consistent with what we believe and interact with people who agree with us whether in

real life or on social media Time and repetition harden our views But here s the wrinkle in general how often do we change our minds about anything Not often and only with great difficulty We hold beliefs that are extremely resistant to change be they related to politics and religion devotion to a sports team or musical genre or even favorite cuisine or style of dress The way we humans are wired comprised of a nexus of beliefs or constructs self interest honed by evolution and logical thinking serve to make each of us fairly predictable and not very open to change We are each of us our own unique one off echo chamber
