Redefining Nature Roy Ellen,Katsuyoshi Fukui,2021-01-07 How can anthropology improve our understanding of the interrelationship between nature and culture What can anthropology contribute to practical debates which depend on particular definitions of nature such as that concerning sustainable development Humankind has evolved over several million years by living in and utilizing nature and by assimilating it into culture Indeed the technological and cultural advancement of the species has been widely acknowledged to rest upon human domination and control of nature Yet by the 1960s the idea of culture in confrontation with nature was being challenged by science philosophy and the environmental movement Anthropology is increasingly concerned with such issues as they become more urgent for humankind as a whole This important book reviews

the current state of the concepts of nature we use both as scientific devices and ideological constructs and is organised around three themes nature as a cultural construction the cultural management of the environment and relations between plants animals and humans

1066: The Lost Hastings Battlefield David John Barnby,John Leftwich,2023-09-30 A fully illustrated examination of the Battle of Hastings historic accounts and analysis on the terrain and topography of the land The year 1066 is a date in English history that changed the way people lived and were governed as well as transforming the language of the land Astonishingly this

book finds the traditional site attracting many thousands of visitors each year is not where the battle was actually fought The death of King Edward the Confessor in January 1066 set off competing claims for the English throne by Norwegian King Harald Hardrada Duke William of Normandy and the English magnate Harold Godwinson contentions finally settled at the epic Battle of Hastings later that year This book tells the compelling story from the Norman duke s crossing with an army that included a large cavalry contingent in a fleet of Viking looking longboats from St Valery on the French coast to the final battle the Battle of Hastings on Blackhorse Hill on the high ridge some two miles east of the traditional site at Battle Abbey It was there that King Harold met his end when surrounded and attacked by Norman knights in the closing stages of the battle In addition the story from the Viking invasion of Lindisfarne until William s crossing of the Channel and events leading up to William s death have been included to provide context to our main story The sequence of events told here relies upon the several historic accounts and the placing of events carefully matching them to the terrain described there with the topography of the area a painstaking process of trial and error to accurately place the battle site on Blackhorse Hill The author has made use of satellite imagery not previously available to earlier authors on the battle to confirm the location of the old Cinque port of Hastings first proposed by Nick Austin in his *Secrets of the Norman Invasion* the site of Duke Williams s pre battle camp The author has analyzed the relative distances from the old port to the Battle Abbey site and the Blackhorse Hill site to eliminate the former and confirm the latter As far as is known no one has ever considered the Blackhorse Hill site before and it is hoped that this will inspire researchers to expand upon these findings

Historic English Churches Geoffrey R. Sharpe, 2011-07-30 The ancient churches and cathedrals of England s towns and countryside are among the glories of our national heritage the church spire one of the quintessential features of the landscape Yet how were our ancestors able to construct these often substantial edifices without the benefit of modern techniques How did medieval masons plan design and oversee their construction What methods of construction were used to achieve the magnificent church spires and ceilings that we marvel at today Geoffrey R Sharpe brings more than forty years of experience of managing and caring for historic buildings to provide a unique guide to the design and construction of our historic churches and cathedrals Building a cathedral could require a workforce of 300 to 400 men the quarrying of 80 000 tons of stone and involve the felling of 1500 trees How all this was organized managed and realized is explained in this compelling volume The author deals with all aspects from original planning and preparation to the final construction and decoration The layout and choice of materials the construction of the foundations walls and ceilings the work of the highly skilled medieval masons blacksmiths and carpenters are all described and explained Individual aspects of church architecture such as corbels tracery and windows as well as important features of church interiors such as galleries burial vaults and screens are included And in a final chapter the author shows the reader how to assess the history and development of a church from the constructional and architectural clues contained within its features The result is a work that will add a whole new dimension

to understanding English church building and architecture Hardwicke's Science-gossip Mordecai Cubitt Cooke, John Ellor Taylor, 1892 *Proceedings of the Suffolk Institute of Archaeology and Natural History* Suffolk Institute of Archaeology and Natural History, 1894 **Nothing Sacred: the murder of a village parson in 17th century England-a true story** Ian Abel, 2006 *Michael Falcon: Norfolk's Gentleman Cricketer* Stephen Musk, 2010

Michael Falcon 1888 1976 was educated at Harrow and Cambridge and proved himself to be a good enough fast bowler to be selected fourteen times for the Gentlemen He declined to qualify by residence to play for Middlesex preferring instead to play for his beloved Norfolk in the Minor Counties Championship In this competition his exploits as a hard hitting fast bowling all rounder made him a dominant figure in Norfolk elevens Appointed captain in 1912 he was still in office in 1946 he was the only man to skipper his county before the First World War and after the Second An astute and popular leader he was worth his place in the team to the end finishing top of the batting averages in his final season when aged 58 Thought of highly enough by the authorities to be co opted on to the MCC Committee at the early age of 26 he was the only bowler of genuine pace to sit on the sub committee which ruled on bodyline He is most famous for the part he played in helping Archie MacLaren s eleven to defeat Warwick Armstrong s previously invincible 1921 tourists Informed opinion suggests that his refusal to play for Middlesex cost him the chance to play Test cricket but his loyalty to Norfolk was paramount and he never expressed any regrets As a Tory M P and a landowning grandee one might expect him to have been a somewhat remote and forbidding character but he was a quiet and modest man with a love of the game which gave him a bond with the common cricketer On one occasion he was more than ready to lead a singalong with the players of a village cricket club Stephen Musk tells a story of privilege public service and the pastime of cricket
