**Postmodern Moments in Modern Economics** David F. Ruccio,Jack Amariglio,2016-06-28 Of all the areas of contemporary thought economics seems the most resistant to the destabilizing effects of postmodernism Yet David Ruccio and Jack Amariglio argue that one can detect within the diverse schools of thought that comprise the discipline of economics moments that defy the modernist ideas to which many economists and methodologists remain wedded This is the first book to document the existence and to explore the implications of the postmodern moments in modern economics Ruccio and Amariglio begin with a powerful argument for the general relevance of postmodernism to contemporary economic thought They then conduct a series of case studies in six key areas of economics From the idea of the multiple self and notions of uncertainty and information through market anomalies and competing concepts of value to analytical distinctions based on gender and academic standing economics is revealed as defying the modernist frame of a singular science The authors conclude by showing how economic theory would change if the postmodern elements were allowed to flourish A work of

daring analysis sure to be vigorously debated Postmodern Moments in Modern Economics is both accessible and relevant to all readers concerned about the modernist straightjacket that has been imposed on the way economics is thought about and practiced in the world today

*Creating Subaltern Counterpublics* A-gwi Sö, 2017 This is a study of a political and social movement instigated by older Korean women in Japan beginning in the 1990s Koreans in Japan have occupied an unique position among ethnic minority groups Until recently they constituted the largest group of foreign nationals yet they have been marginalized politically socially economically and culturally Korean women are doubly disadvantaged treated as inferior to men by both Korean and Japanese society Furthermore the first generation of Korean women migrants were not educated as children rendering them functionally illiterate and thus triply marginalized Late in life when family and work responsibilities became less onerous local authorities created educational opportunities which the women took up in unexpected numbers overloading the facilities The authorities responses effectively re marginalized them The elderly Korean women took a stance and in the process reconstituted themselves as social and political actors This book examines that self transformation process
