## **Rubbish Theory The Creation And Destruction Of Value:**

**Rubbish Theory** Michael Thompson, 2017 New edition of this classic work which asks How do objects that are of little worth or worth nothing become valuable *Rubbish Theory* Michael Thompson, 1979 Castastrophe Theory a recent development with applications in the natural sciences suggests fresh ways in which we can look at society and the problems of change and stability Using examples ranging from popular art property and education to pigin New Guinea t he author shows how we might look afresh at society s changing assessments of valu **Rubbish Theory** Michael Thompson, 2017-06-20 Rubbish is something we ignore By definition we discard it from our lives and our minds and it remains outside the concerns of conventional economics However this book explores the dynamics through which rubbish can re enter circulation as a prized commodity in many cases far exceeding its original value Antiques vintage cars and period homes after being discarded as valueless can even after many years become priceless First published in 1979 Rubbish Theory has become foundational in its field Today it is as relevant as ever This edition includes a new afterword revealing how the consequences of our compulsion to discard are far from inevitable and going on to explore how we can transform our troublesome wastes into valuable resources **Residual Media** Charles R. Acland, 2007 In a society that awaits the new in every medium what happens to last year s new From player pianos to vinyl records and from the typewriter to the telephone Residual Media is an innovative approach to the aging of culture and reveals that ultimately new cultural phenomena rely on encounters with the old **Culture and Waste** Gay Hawkins, Stephen Muecke, 2003 Waste is a key category for understanding cultural value It is not just the bad stuff we dispose of it is material we constantly struggle to redeem Cultures seem to spend as much energy reclassifying negativity as they do on establishing the negative itself The huge tertiary sector devoted to waste management converts garbage into money while ecological movements continue to stress human values and the natural But the problems waste poses are never simply economic or environmental The international contributors to this collection ask us to pause and consider the complex ways in which value is created and destroyed Their diverse approaches of ethics philosophy cultural studies and politics are at the forefront of a new field of ecohumanites *Visible Signs (Second Edition)* David Crow, 2010 Visible Signs explains semiotic terms and theories in relation to visual communication with illustrative examples taken from contemporary art and design This edition features new and revised content and includes 200 visuals created to illustrate the ideas discussed within the book **Indispensable Eyesores** Mélanie van der Hoorn, 2009 The author presents a rich variety of undesired edifices in Germany Hungary Austria and Bosnia Herzegovina and investigates the different methods used of dispose of them This analysis continues with a reflection on the afterlife of unwanted buildings and concludes with a discussion on the life expectancy of buildings their multi sensory materiality and thing ly agency From back cover **Cleaning Up Renaissance Italy** Jane L. Stevens Crawshaw, 2023 Cleaning Up Renaissance Italy takes us to the streets bridges and waterways of Renaissance Genoa and Venice exploring

how environmental management street cleaning water provision waste disposal and reuse relates to cultural ideals individual and collective behaviour political reputations and social identities      **Waste-Site Stories** Brian Neville, Johanne Villeneuve, 2012-02-01 Ours is a wasteful society consumed with care for its remains according to the contributors of *Waste Site Stories* Here scholars from around the world probe current notions of waste and the ways in which remains of different kinds recover value in the act of recollection and recycling In the wake of destructive experiences that continue to trouble memory there is something compelling about today's theoretical and artistic interest in waste and recycling The two terms provide a purchase on changing conditions of cultural memory on technological development and its sometimes toxic ecological and social fallout and on the legacy of personal and historical trauma They suggest new resources for the stories of our engagement with the things of the past and the sites where traces of history survive      **Writing Chinese** L. Chen, 2006-04-29 This is a comparative study of the politics of Chinese cultural identity facing China Taiwan Hong Kong the US Chinese and the Chinese diaspora in the West The author challenges current discussions of hybridity and nationalism by contrasting the experiences of Taiwan Hong Kong and US Chinese with those of China and the Chinese diaspora      *The Literature of Waste* S. Morrison, 2015-06-03 Tracing material and metaphoric waste through the Western canon ranging from Beowulf to Samuel Beckett Susan Signe Morrison disrupts traditional perceptions of waste to better understand how we theorize manage and are implicated in what is discarded and seen as garbage Engaging a wide range of disciplines Morrison addresses how the materiality of waste has been sedimented into a variety of toxic metaphors If scholars can read waste as possessing dynamic agency how might that change the ethics of refusing and ostracizing wasted humans A major contribution to the growing field of Waste Studies this comparative and theoretically innovative book confronts the reader with the ethical urgency present in waste literature itself      **Spoil Island** Charlie Hailey, 2013-08-01 Is there an allure of spoiled places Spoil islands are overlooked places that combine dirt with paradise waste land with brave new world and wildness with human intervention Although they are mundane products of dredging these islands form an uninvestigated archipelago that demonstrates the potential value and contested revaluation of landscapes of waste To explore these islands Spoil Island Reading the Makeshift Archipelago navigates a course along the US east coast moving from New York City to Florida Along the way a general populace squats picnics and reflects on the islands while other forces are also at work New York City parks commissioner Robert Moses first deplores then adopts Hoffman and Swinburne Islands UN Secretary General U Thant meditates on the East River's Belmont Island businessman John D MacArthur rejects the purchase of Peanut Island artist Christo surrounds Miami's spoil islands Key Westers debate the futures of two spoil islands that mark their sunset view and artist Robert Smithson augments this archipelago materially and conceptually Historical and contemporary stories highlight each island's often contradictory ecologies that pair nature with infrastructure public concerns with private development rationalized urbanism with artistic impulse and order with disorder Spoil islands put you in places you normally

wouldn't and perhaps shouldn't be To examine these marginalized topographies is to understand emergent concerns of twenty first century place making public space and natural and artificial infrastructure Today spoil islands constitute an unprecedented public commons where human agency and nature are inextricably linked Spoil Island will be of interest to anyone working in the areas of architecture cultural history cultural geography environmental studies or environmental philosophy Linking the islands with their environmental aesthetics Charlie Hailey provides a lively and critical topography of places that play a part in current events and local situations with global implications

**Values and Revaluations** Hans Peter Hahn, Anja Klöckner, Dirk Wicke, 2022-03-24 Why are some things valuable while others are not How much effort does it take to produce valuable objects How can one explain the different appraisal of certain things in different temporal horizons and in different cultures Cultural processes on how value is attached to things and how value is re-established are still little understood The case studies in this volume originating from anthropology and archaeology provide innovative and differentiated answers to these questions However for all contributions there are some common basic assumptions One of these concerns the understanding that it is rarely the value of the material itself that matters for high valuation but rather the appreciation of the assumed or constructed origin of certain objects or their connection with certain social structures A second of these shared insights addresses the ubiquity of phenomena of value in things There is no society without valued objects As a rule valuation is something negotiated or even disputed Value arises through social action whereby it is always necessary to ask anew which actors are interested in the value of certain objects or in their appreciation This also works the other way round Who are those actors who question corresponding objective values and why

*The Re-Use of Urban Ruins* Hanna Katharina Göbel, 2014-12-05 How do urban ruins provoke their cultural revaluation This book offers a unique sociological analysis about the social agencies of material culture and atmospheric knowledge of buildings in the making It draws on ethnographic research in Berlin along the former Palace of the Republic the E Werk and the Caf Moskau in order to make visible an interdisciplinary regime of design experts who have developed a professional sensorium turning the built memory of the city into an object of aesthetic inquiry

*Waste Paper in Early Modern England* Anna Reynolds, 2024 Waste Paper in Early Modern England argues that rhetorical commonplaces referring to waste paper are indicative of everyday material experience of an author's reader's housewife's or city dweller's immersion in an environment brimming with repurposed scraps and sheets

Who Plans the Planning? Lucius Burckhardt, 2019-11-18 From the 1950s Lucius Burckhardt 1925-2003 focused on planning design and construction in a democracy His astute observations and critical analysis have had a fundamental effect on the design of our environment on teaching in the architectural planning professions and on our understanding of what city means His research which between mighty commercial interests and conflicting political aspirations focuses on the benefit for the entire population is indispensable when and wherever buildings are planned designed built and inhabited With a new selection of texts this book ploughs a furrow through Lucius Burckhardt's theory of

planning     *Game After* Raiford Guins, 2014-01-24 A cultural study of video game afterlife whether as emulation or artifact in an archival box or at the bottom of a landfill We purchase video games to play them not to save them What happens to video games when they are out of date broken nonfunctional or obsolete Should a game be considered an ex game if it exists only as emulation as an artifact in museum displays in an archival box or at the bottom of a landfill In *Game After* Raiford Guins focuses on video games not as hermetically sealed within time capsules of the past but on their material remains how and where video games persist in the present Guins meticulously investigates the complex life cycles of video games to show how their meanings uses and values shift in an afterlife of disposal ruins and remains museums archives and private collections Guins looks closely at video games as museum objects discussing the recontextualization of the Pong and Brown Box prototypes and engaging with curatorial and archival practices across a range of cultural institutions aging coin op arcade cabinets the documentation role of game cartridge artwork and packaging the journey of a game from flawed product to trash to memorialized relic as seen in the history of Atari's infamous E.T. The Extra Terrestrial and conservation restoration and re-creation stories told by experts including Van Burnham Gene Lewin and Peter Takacs The afterlife of video games whether behind glass in display cases or recreated as an iPad app offers a new way to explore the diverse topography of game history

**A Handbook of Economic Anthropology** Carrier, James G., 2022-05-13 This timely Research Agenda examines the ways in which public private partnerships PPPs in infrastructure continue to excite policy makers governments research scholars and critics around the world It analyzes the PPP research journey to date and articulates the lessons learned as a result of the increasing interest in improving infrastructure governance Expert international contributors explore how PPP ideas have spread transferred and transformed and propose a range of future research directions

**Capitalism by Gaslight** Brian P. Luskey, Wendy A. Woloson, 2015-03-18 While elite merchants financiers shopkeepers and customers were the most visible producers consumers and distributors of goods and capital in the nineteenth century they were certainly not alone in shaping the economy Lurking in the shadows of capitalism's past are those who made markets by navigating a range of new financial instruments information systems and modes of transactions prostitutes dealers in used goods mock auctioneers illegal slavers traffickers in stolen horses emigrant runners pilfering dock workers and other ordinary people who through their transactions and lives helped to make capitalism as much as it made them *Capitalism by Gaslight* illuminates American economic history by emphasizing the significance of these markets and the cultural debates they provoked These essays reveal that the rules of economic engagement were still being established in the nineteenth century delineations between legal and illegal moral and immoral acceptable and unsuitable were far from clear The contributors examine the fluid mobility and unstable value of people and goods the shifting geographies and structures of commercial institutions the blurred boundaries between legitimate and illegitimate economic activity and the daily lives of men and women who participated creatively and often subversively in American commerce With subjects ranging from

women's studies and African American history to material and consumer culture this compelling volume illustrates that when hidden forms of commerce are brought to light they can become flashpoints revealing the tensions fissures and inequities inherent in capitalism itself Contributors Paul Erickson Robert J Gamble Ellen Gruber Garvey Corey Goettsch Joshua R Greenberg Katie M Hemphill Craig B Hollander Brian P Luskey Will B Mackintosh Adam Mendelsohn Brendan P O Malley Michael D Thompson Wendy A Woloson     The Limits to Scarcity Lyla Mehta, 2013-05-13 Scarcity is considered a ubiquitous feature of the human condition It underpins much of modern economics and is widely used as an explanation for social organisation social conflict and the resource crunch confronting humanity's survival on the planet It is made out to be an all pervasive fact of our lives be it of housing food water or oil But has the conception of scarcity been politicized naturalized and universalized in academic and policy debates Has overhasty recourse to scarcity evoked a standard set of market institutional and technological solutions which have blocked out political contestations overlooking access as a legitimate focus for academic debates as well as policies and interventions Theoretical and empirical chapters by leading academics and scholar activists grapple with these issues by questioning scarcity's taken for granted nature They examine scarcity debates across three of the most important resources food water and energy and their implications for theory institutional arrangements policy responses and innovation systems The book looks at how scarcity has emerged as a totalizing discourse in both the North and South The scare of scarcity has led to scarcity emerging as a political strategy for powerful groups Aggregate numbers and physical quantities are trusted while local knowledges and experiences of scarcity that identify problems more accurately and specifically are ignored Science and technology are expected to provide solutions but such expectations embody a multitude of unexamined assumptions about the nature of the problem about the technologies and about the institutional arrangements put forward as a fix Through this examination the authors demonstrate that scarcity is not a natural condition the problem lies in how we see scarcity and the ways in which it is socially generated
