Rubia Continuity And Change:

Medieval Pharmacotherapy, Continuity and Change Helena M. Paavilainen, 2009 The development of medical drug therapy in medieval times can be seen as an interplay between tradition and innovation This book follows the changes in the therapy from the Arabic medicine of Ibn S n Avicenna to Latin medical scholasticism aiming to trace both the continuity and the development in the theory and practice of medieval drug therapy In this delicate balance between change and continuity a crucial role was played by the scientific community through critical rejection or acceptance of new ideas The drug choices were in most cases rational also from the point of view of contemporary medical theory The method used in the book for studying these choices could promote the development of a novel methodology for historical ethnopharmacology **The Oxford Handbook of Autism and Co-Occurring Psychiatric Conditions** Susan W. White, Brenna B. Maddox, Carla A. Mazefsky, 2020 The Oxford Handbook of Autism and Co Occurring Psychiatric Conditions is the first sole source volume that synthesizes a vast amount of literature on all aspects of psychiatric comorbidity in autism **Ethnobotany of Northern Africa and Levant** Rainer W. Bussmann, Mostafa Elachouri, Zaal Kikvidze, 2024-11-15 Research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline including climate change research conservation and sustainable development It has by now widely been recognized that traditional knowledge is always in flux and adapting to a quickly changing environment Trends of globalization especially the globalization of plant markets have greatly influenced how plant resources are managed nowadays While ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market Scholars in plant sciences worldwide will be interested in this dynamic content The field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years Student interest is on the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly Various societies of such professionals include the Society for Economic Botany the International Society of Ethnopharmacology the Society of Ethnobiology the International Society for Ethnobiology and many regional and national societies in the field that currently have thousands of members Growth has been most robust in BRIC countries The objective of this new MRW on Ethnobotany of Mountain Regions is to take advantage of the increasing international interest and scholarship in the field of mountain research We anticipate including the best and latest research on a full range of descriptive methodological theoretical and applied research on the most important plants for each region Each contribution will be scientifically rigorous and contribute to the overall field of study *Gringolandia* Stephen D. Morris, 2005 Mexico s views of the United States have been characterized as stridently anti American but recent policy changes in Mexico culminating with the North American Free Trade Agreement NAFTA mark a fundamental transformation in the relationship This thoughtful and original work answers questions about the impact of these policy shifts on Mexican nationalism and

perceptions of the United States Have popular and elite views changed Has the government s anti American rhetoric become anachronistic What has been the effect on Mexican national identity As the only developing country to have entered into a free trade agreement with a developed country Mexico offers a unique and invaluable case study of the impact of globalization on a nation and its national identity Exploring Mexico s experience also allows us to consider how other countries perceive the United States especially in the post 9 11 climate Analyzing the diversity of Mexican views of the United States Gringolandia contributes a rich and nuanced dimension to our understanding of contemporary Mexico and Mexicans feelings about the vital cross border relationship

Ethnobotany of the Mountain Regions of Eastern Europe Rainer W. Bussmann,Narel Y. Paniagua-Zambrana,Zaal Kikvidze,2025-04-23 Natural resources and associated biological diversity provide the basis of livelihood for humans particularly in the rural areas and mountain regions around the world Over centuries indigenous peoples traditional societies and local communities have developed their own specific knowledge regarding plant use management and conservation The history of plant use by humans as food and to treat diverse ailments dates back to ancient civilizations Even though the advent of allopathic medicine has somehow minimized the role of medicinal plants in favor of synthetic drugs a number of modern drug discoveries have been based on medicinal plants used by indigenous peoples Ethnobiology is the burgeoning interdisciplinary scientific field which covers all types of interactions between plants and people and Eastern Europe is recognized as a plant diversity hot spot This new Major Reference Work on the Ethnobotany of Mountain Regions of Eastern Europe Carpathians covers in detail the mountains and vallies of this region which are known to be rich in unique medicinal and food plant species Local communities residing in the mountain regions of Eastern Europe possess unique knowledge of surrounding resources which is the result of many years of interaction with and selection of the most desirable and pervasive plant species present In this context this major reference work provides

comprehensive information on cross culture variation in the traditional uses of plants as food medicine and for cultural purposes among these diverse communities residing in Eastern Europe The key areas of focus include plant diversity in the Carpathians cross cultural variation in traditional uses of plant species by these communities high value medicinal and food plant species and threats and conservation status of plant species and traditional knowledge **Gaze-Following** Ross

Development of executive function during childhood Yusuke Moriguchi, Philip D Zelazo, Nicolas

Chevalier, 2016-04-01 Executive function refers to the goal oriented regulation of one's own thoughts actions and emotions Its importance is attested by its contribution to the development of other cognitive skills e.g. theory of mind social abilities e.g. peer interactions and academic achievement e.g. mathematics and by the consequences of deficits in executive function which are observed in wide range of developmental disorders such as attention deficit hyperactivity disorder and autism Over the last decade there have been growing interest in the development of executive function and an expanding body of research has shown that executive function develops rapidly during the preschool years with adult level performance being achieved during adolescence or later This recent work together with experimental research showing the effects of interventions targeting executive function has yielded important insights into the neurocognitive processes underlying executive function Given the complexity of the construct of executive function however and the multiplicity of underlying processes there are often inconsistencies in the way that executive function is defined and studied This inconsistency has hampered communication among researchers from various fields This Research Topic is intended to bridge this gap and provide an opportunity for researchers from different perspectives to discuss recent advances in understanding childhood executive function Researchers using various methods including behavioral experiments neuroimaging eye tracking computer simulation observational methods and questionnaires are encouraged to contribute original empirical research In addition to original empirical articles theoretical reviews and opinions perspective articles on promising future directions are welcome We hope that researchers from different areas such as developmental psychology educational psychology experimental psychology neuropsychology neuroscience psychiatry computational science etc will be represented in the Research Topic

Goldman, Frances J Wren, 2012-06-08 Recent work on emotional regulation gives a powerful new lens through which to view the evolution across childhood and adolescence of the lived experience and clinical presentation of depression We have a richer picture of the depressed child and the child at risk for depression in interaction with family and wider world We know more about the development and the developmental psychopathology of coping strategies These advances give provocative clues to the actual processes whereby well established risk and protective factors might interact to produce sustain or curtail a depressive syndrome This in turn opens the door to treatment and prevention approaches that are truly developmentally informed This is the philosophy behind this completely updated and comprehensive analysis of childhood depression

Agrarian Change and Crisis in Europe, 1200-1500 Harilaos Kitsikopoulos, 2012-03-15 Agrarian Change and Crisis in Europe 1200 1500 addresses one of the classic subjects on economic history the process of aggregate economic growth and the crisis that engulfed the European continent during the late Middle Ages This was not an ordinary crisis During the period 1200 1500 Europe witnessed endemic episodes of famine and a wave of plague epidemics that amounted to one of its worst health crises rivaled only by the Justinian plague in the sixth century These challenges called into question the production of goods and services and the distribution of wealth opening the possibility of fundamental systemic change This book offers an empirical synthesis on a host of economic demographic and technological developments which characterized the period 1200 1500 It covers virtually the entire continent and places equal emphasis both on providing a solid factual framework and comparing and contrasting various theoretical interpretations The broad geographical and conceptual scope of the book renders it indispensable not only for undergraduate students who take courses relating to the economic and social life of the Middle Ages but also to more advanced scholars who often specialize in only one country or region Handbook of Autism and Pervasive Developmental Disorders, Diagnosis, Development, Neurobiology, and Behavior Fred R. Volkmar, Rhea Paul, Ami Klin, Donald J. Cohen, 2005-04-29 Now expanded to two volumes this invaluable reference work provides a comprehensive review of all information presently available about these disorders drawing on findings and clinical experience from a number of related disciplines such as psychiatry psychology neurobiology pediatrics etc The Handbook covers descriptive and diagnostic characteristics biological contributions intervention techniques legal and social issues The Third Edition is updated to include the newest work in animal models genetics neuropsychological processes screening and assessment methods Integration in Multicultural England Jörg Friedrichs, 2025-07-24 Positive relations between Muslims and non Muslims are important for the future in Britain and beyond By studying community relations this book takes an innovative approach that moves beyond mapping British Muslims or British Islam Instead Jörg Friedrichs discusses the actual ways Muslims and non Muslims relate or fail to relate where it matters most namely in diverse inner cities Is Britain a

multicultural country is it moving towards greater integration or is this a false dichotomy Given their unique everyday experience inner city residents prove to be experts when it comes to community relations To give them a voice and learn from their experience the book takes us on a tour of diverse English inner cities Reassuringly the grassroots perspective of residents is consistent with a vision of integration in multicultural England Residents are concerned not so much about hot button issues like extremism or terrorism Instead their minds are set on practical matters how to coexist peacefully in stressful urban environments and how to find love and raise families when norms diverge Caught between grievance and aspiration inner city residents from any background express disappointment at Muslim and non Muslim parents sending their children to different schools They also discuss whether governance should be community blind or community based and if Britain is ready for a Muslim Prime Minister In all of this Muslim and non Muslim residents acknowledge that we live in a multicultural society For most however it does not follow that we should adopt multiculturalism as an ideology Instead most people crave and support a move towards greater integration

Evergreen Oak Woodlands' Role in Tackling Climate Change and Preserving Mediterranean Landscapes Rocco Carella, 2023-09-01 In the Mediterranean basin one of the richest biodiversity hotspots on the planet evergreen oak woodlands are essential elements This book facilitates a more detailed ecological understanding of *Quercus calliprinos* a lesser known Mediterranean forest species that could make an important contribution to the struggle to counteract climate change and biodiversity loss The book also discusses two further crucial species of the Mediterranean evergreen woodlands *Quercus ilex* and *Quercus suber* focusing on the role of forest management in their conservation

The Galician Works of Ramón Del Valle-Inclán Ann Frost, 2010 Ramón del Valle Inclán 1866-1936 was undoubtedly the most controversial literary figure of his generation Whilst his genius was recognised by fellow writers the reading public was slow to accept his work and his theatre taxed directors and audiences alike One of the harshest criticisms levelled against him concerned his use of repetition This study shows how the reuse recycling and development of material becomes one of the hallmarks of Valle Inclán's writing during the first three decades of his literary career linking one genre with another and blurring the borders between different aesthetics The repetition of themes and motifs characters and stylistic devices reveals an underlying interdependence among works that on the surface appear unconnected or even contradictory Many of Valle Inclán's works have been studied in isolation rather than as pieces of a whole This book examines the elements that provide significant links in his writing between 1889 and 1922 most of which shares the common backdrop of Galicia and demonstrates that apparently unrelated works are part of a larger picture Despite changes in perspective and genre there are constants that relate individual works to those that precede and follow creating a unifying pattern of continuity
