The Natural History of Sexuality in Early America Greta LaFleur, 2020-08-04 How natural history made sex scientific in the eighteenth century If sexology the science of sex came into being sometime in the nineteenth century then how did statesmen scientists and everyday people make meaning out of sex before that point In *The Natural History of Sexuality in Early America* Greta LaFleur demonstrates that eighteenth century natural history the study of organic life in its environment actually provided the intellectual foundations for the later development of the scientific study of sex Natural historians understood the human body to be a porous envelope eminently vulnerable to its environment Yet historians of sexuality have tended to rely on archival evidence of genital based or otherwise bodily sex acts for source material Through careful readings of both elite natural history texts and popular print forms that circulated widely in the British North American colonies among them Barbary captivity execution cross dressing and anti vice narratives LaFleur traces the development of a broad knowledge of sexuality defined in terms of the dynamic relationship between the human and the natural social physical and climatic milieu At the heart of this book is the question of how to produce a history of sexuality for an era in which modern vocabularies for sex and desire were unavailable LaFleur demonstrates how environmental logic was used to explain sexual behavior on a broad scale not just among the educated elite who wrote and read natural historical texts LaFleur reunites the history of sexuality with the history of race demonstrating how they were bound to one another by the emergence of the human sciences Ultimately *The Natural History of Sexuality in Early America* not only rewrites all dominant scholarly narratives of eighteenth century sexual behavior but also poses a major intervention into queer theoretical understandings of

the relationship between sex and the subject **Subjectivity and Sexuality in Contemporary Chinese Feminist Writing** Ruttapond Swanpitak, 2025-02-17 This book explores representations of female sexuality and subjectivity in contemporary Chinese fiction by three women writers published from 1986 to 2000 from the perspective of poststructuralist feminism It discusses the representative works of authors Wang Anyi Tie Ning and Chi Li who are well known in the Chinese literary field However their works have not to date been analysed through the poststructuralist feminism s notions of subjectivity femininity and transgression This book then provides detailed analysis of each writer and draws comparisons between their works to provide an extended consideration of female sexuality and subjectivity within post Mao Chinese fiction In this respect this book not only offers fresh insights into the three authors fiction but also contributes to the feminist study of Chinese women s writing Additionally the research contributes to a better understanding of contemporary Chinese culture in relation to patriarchy misogyny feminism differences and resistance It is relevant to scholars in the fields of China studies Chinese literature feminist literature and gender studies **Gender Talk** Johnnetta B. Cole, Beverly Guy-Sheftall, 2009-01-16 Why has the African American community remained silent about gender even as race has moved to the forefront of our nation s consciousness In this important new book two of the nation s leading African American intellectuals offer a resounding and far reaching answer to a question that has been ignored for far too long Hard hitting and brilliant in its analysis of culture and sexual politics Gender Talk asserts boldly that gender matters are critical to the Black community in the twenty first century In the Black community rape violence against women and sexual harassment are as much the legacy of slavery as is racism Johnnetta Betsch Cole and Beverly Guy Sheftall argue powerfully that the only way to defeat this legacy is to focus on the intersection of race and gender Gender Talk examines why the race problem has become so male centered and how this has opened a deep divide between Black women and men The authors turn to their own lives offering intimate accounts of their experiences as daughters wives and leaders They examine pivotal moments in African American history when race and gender issues collided with explosive results from the struggle for women s suffrage in the nineteenth century to women s attempts to gain a voice in the Black Baptist movement and on into the 1960s when the Civil Rights movement and the upsurge of Black Power transformed the Black community while sidelining women Along the way they present the testimonies of a large and influential group of Black women and men including bell hooks Faye Wattleton Byllye Avery Cornell West Robin DG Kelley Michael Eric Dyson Marcia Gillispie and Dorothy Height Providing searching analysis into the present Cole and Guy Sheftall uncover the cultural assumptions and attitudes in hip hop and rap in the O J Simpson and Mike Tyson trials in the Million Men and Million Women Marches and in the battle over Clarence Thomas s appointment to the Supreme Court Fearless and eye opening Gender Talk is required reading for anyone concerned with the future of African American women and men Television, Sex and Society Beth Johnson, James Aston, Basil Glynn, 2012-06-14 Focuses upon contemporary expressions and representations of televisual sex discussing British US and Asian television to engage with

ideas of gender genre and dramatic politics *From Animals to Animats 2* Jean-Arcady Meyer, H. L. Roitblat, Stewart W. Wilson, 1993 More than sixty contributions in *From Animals to Animats 2* by researchers in ethology ecology cybernetics artificial intelligence robotics and related fields investigate behaviors and the underlying mechanisms that allow animals and potentially robots to adapt and survive in uncertain environments Jean Arcady Meyer is Director of Research CNRS Paris Herbert L Roitblat is Professor of Psychology at the University of Hawaii at Manoa Stewart W Wilson is a scientist at The Rowland Institute for Science Cambridge Massachusetts Topics covered The Animat Approach to Adaptive Behavior Perception and Motor Control Action Selection and Behavioral Sequences Cognitive Maps and Internal World Models Learning Evolution Collective Behavior *Reading Rape* Sabine Sielke, 2009-02-09 *Reading Rape* examines how American culture talks about sexual violence and explains why in the latter twentieth century rape achieved such significance as a trope of power relations Through attentive readings of a wide range of literary and cultural representations of sexual assault from antebellum seduction narratives and realist representations of rape in nineteenth century novels to *Deliverance* *American Psycho* and contemporary feminist accounts Sabine Sielke traces the evolution of a specifically American rhetoric of rape She considers the kinds of cultural work that this rhetoric has performed and finds that rape has been an insistent figure for a range of social political and economic issues Sielke argues that the representation of rape has been a major force in the cultural construction of sexuality gender race ethnicity class and indeed national identity At the same time her acute analyses of both canonical and lesser known texts explore the complex anxieties that motivate such constructions and their function within the wider cultural imagination Provoked in part by contemporary feminist criticism *Reading Rape* also challenges feminist positions on sexual violence by interrogating them as part of the history in which rape has been a convenient and conventional albeit troubling trope for other concerns and conflicts This book teaches us what we talk about when we talk about rape And what we are talking about is often something else entirely power money social change difference and identity *The Lever of Riches* Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the

social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
