Death and Philosophy J.E Malpas, Robert C. Solomon, 2002-06-01 Death and Philosophy considers these questions with different perspectives varying from the existentialist deriving from Camus Heidegger or Sartre to the English speaking analytic tradition of Bernard Williams or Thomas Nagel to non western approaches such as are exemplified in the Tibetan Book of the Dead and in Daoist thought to perspectives influenced by Lucretius Epicurus and Nietzsche Death and Philosophy will be of great interest to philosophers or those studying religion and theology but its clarity and scope ensures it will be accessible to anyone who has considered what it means to be mortal

A Systems Approach to Social and Organizational Planning Gerrit Van Wyk, 2003 A Systems Approach to Social And Organizational Planning is about systems thinking and its application in health care Health care systems all over the world are on the verge of breakdown and neither patients nor governments and businesses can afford health care delivery as we know it any longer The problem is that planners still conceptualize enormously complex biological and social systems in a simplistic manner An analysis of the problem indicates that the solution lies in using a holistic approach such as the systems approach to re conceptualize our thinking about the problem situation The result is a systems view of health which has profound implications for planning and change management in health care It is a fresh and different approach to an intractable problem and therefore deserves the attention of both systems thinkers and health care planners The purpose of the text is to introduce readers to the systems approach and to contribute towards the current debate about health care planning The target audience is therefore students new to systems thinking and specifically health care planners Publisher
