Shades Of Green Business Regulation And Environment

David Kinley

Shades Of Green Business Regulation And Environment:

Shades of Green Neil Gunningham, Robert A. Kagan, Dorothy Thornton, 2003 This in depth study of fourteen pulp manufacturing mills in the United States Canada Australia and New Zealand provides the most extensive and systematic empirical examination to date of the reasons firms achieve the levels of environmental performance that they do **Green Ethics and Philosophy** Julie Newman, 2011-06-28 Covers the moral relationship between humans and their natural environment specifically targeting the contemporary green movement **Designing Government** F. Pearl Eliadis, Margaret M. Hill, Michael Howlett, 2005 This collection of readings examines the tools used by today s government to achieve legitimacy effectiveness and accountability The contributors examine the instrument choice perspective on government and public policy over the past two decades moving beyond the preoccupation with deregulation and efficiency to trace the complex relationships between instrument choices and governance Readers are encouraged to consider factors in the design of complex mixes such as issues of redundancy context the rule of law and accountability These latter factors are especially central in today s world to the design and implementation of effective instrument choices by governments and ultimately to good governance The authors conclude that instrument choice itself is integral to government and governance

Regulating Land and Pollution in China Benjamin van Rooij, 2006 Annotation Many of China s rivers and lakes are strongly polluted the air in cities is amongst the worst in the world while some have warned that if the country is not careful it may soon have insufficient arable land to feed its population This book looks at why the protection of natural resources through stricter legislation and more stringent law enforcement has been so difficult It does so through a combination of a local case with comparative and theoretical insights about lawmaking compliance and enforcement It offers a unique view on how law functions in the world s largest legal system and how such law interacts with the social economic and political circumstances at hand This book offers an incomparable body of empirical and theoretical knowledge for those interested in how law functions in China as well as those interested in the workings of regulatory lawmaking compliance and enforcement in a comparative perspective This title can be previewed in Google Books <http://books.google.com/books/vid>

ISBN9789087280130 **Hazardous Waste and Pollution** Tanya Wyatt, 2015-10-12 This volume examines crimes that violate environmental regulations as part of an emerging area of criminology known as green criminology The contributions to this book examine criminal justice concerns related to regulating and enforcing environmental laws as well as the consequences for families and communities impacted by hazardous waste and pollution It also describes possible strategies for deterring and preventing organized crime related to environmental regulations including black market sales of ozone depleting substances This innovative volume provides a criminological framework for understanding environmental harms Examining cases from the US Europe and Australia this volume compares and contrasts international approaches for regulating hazardous substances and enforcing those regulations This work will be of interest to researchers in criminology

and criminal justice particularly interested in green criminology or environmental law as well as researchers in environmental sciences white collar and corporate crime and policymakers

Reflexive Governance for Global Public Goods Eric Brousseau, Tom Dedeurwaerdere, Bernd Siebenhüner, 2012 Global public goods GPGs the economic term for a broad range of goods and services that benefit everyone including stable climate public health and economic security pose notable governance challenges At the national level public goods are often provided by government but at the global level there is no established state like entity to take charge of their provision The complex nature of many GPGs poses additional problems of coordination knowledge generation and the formation of citizen preferences This book considers traditional public economy theory of public goods provision as oversimplified because it is state centered and fiscally focused It develops a multidisciplinary look at the challenges of understanding and designing appropriate governance regimes for different types of goods in such areas as the environment food security and development assistance The chapter authors all leading scholars in the field explore the misalignment between existing GPG policies and actors incentives and understandings They analyze the complex impact of incentives the involvement of stakeholders in collective decision making and the specific coordination needed for the generation of knowledge The book shows that governance of GPGs must be democratic reflexive emphasizing collective learning processes and knowledge based in order to be effective

The Art and Craft of International Environmental Law Daniel Bodansky, Harro van Asselt, 2024 In countless ways we are affected by international environmental norms some social others legal some quite general others very specific For example the norms limiting the refrigerants used in air conditioners have been agreed upon in legal form internationally and are mandated and enforced by national governments The sustainable fishery and forestry standards used by Carrefour and Ikea were developed more informally by environmental groups and businesses and are applied to producers through supply chain contracts without any government involvement The reluctance to eat tuna fish or own elephant ivory reflects more general social norms disseminated through education and culture How and why do these norms arise In what ways do they affect behavior Do they change what states and individuals actually do and if so why How effective are they in solving international environmental problems In the second edition of *The Art and Craft of International Environmental Law* Daniel Bodansky and Harro van Asselt explore these and other questions Revisions cover the numerous developments spanning the 13 years since the first edition was published New chapters address the growing role of environmental NGOs and the increasingly complex architecture of environmental law involving multiple institutions levels of governance and actors Recent research has been incorporated on treaty design and policy implementation and effectiveness and greater attention has been given to the role of the judiciary in standard setting implementation and enforcement A sophisticated yet highly readable introduction to how international environmental law works and sometimes doesn't work this book is essential reading for a wide audience

Law and Corporate Behaviour Christopher Hodges, 2015-10-22 This book examines the theories and practice of how to control corporate behaviour through

legal techniques The principal theories examined are deterrence economic rational acting responsive regulation and the findings of behavioural psychology Leading examples of the various approaches are given in order to illustrate the models private enforcement of law through litigation in the USA public enforcement of competition law by the European Commission and the recent reform of policies on public enforcement of regulatory law in the United Kingdom Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied Sectors examined include financial services civil aviation pharmaceuticals and workplace health safety Key findings are that enforcement has to focus on identifying the causes of non compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance Systems in which reporting is essential for safety only function with a no blame culture The book concludes by proposing an holistic model for maximising compliance within large organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles Hence the book proposes a new theory of ethical regulation This title is included in Bloomsbury Professional's International Arbitration online service

[Green Crimes and Dirty Money](#) Toine Spapens, Rob White, Daan van Uhm, Wim Huisman, 2018-05-30 Environmental crimes are primarily driven by financial motives The combined financial value of illicit trade in protected wildlife illegal logging and waste trafficking is estimated to come directly after counterfeiting the narcotic drugs trade and illegal gambling Logically the proceeds of these crimes must also be laundered Goods however are not the only money maker for environmental criminals Corporations may also try to save costs by not complying with environmental regulations and thus commit crimes of omission rather than commission From an enforcement and compliance perspective focusing on the proceeds of crime may therefore be an effective strategy This book brings together different perspectives on the financial aspects of environmental crime and harm from a green criminological viewpoint It addresses the role of economic systems the value of environmental performance for corporations money laundering in the context of environmental crime financial investigation and questions of regulation and penalties Discussing these topics from the view of green criminology sociology and governance this book will be of great interest to all those concerned about the financial dimensions of crime and the environment

Human Rights and Corporations David Kinley, 2017-05-15 The erstwhile unlikely coupling of human rights and corporations is now a typical feature of corporate community relations High profile corporate infringements of human rights the rise and rise of corporate social responsibility CSR and on going efforts to regulate corporate behaviour through legal regimes at both domestic and international levels have spawned a mountain of academic literature and commentary This volume assembles the leading essays from this body of work Together they frame the relationship between human rights and corporations by charting its history and salient features tackle the conceptual perspectives of the relationship and detail the practice problems and potential of the

relationship
