Allison,2007-01-04 This book contains catalogues analyses photographs and drawings of some 2 000 archaeological artefacts excavated from the Insula of the Menander in Pompeii The catalogues and analyses are organized by provenance buildings rooms and location within rooms so that the reader can understand the artefacts as household assemblages The functions of artefacts and groups of artefacts are discussed as are the Latin names which are often given to these artefacts and the relationships of these assemblages to the state of occupancy of the buildings in the Insula during the last years of Pompeii This study therefore provides a wealth of information not only on the range and use of artefacts in Pompeian houses but also on Roman artefacts and Roman society more generally **Herculaneum** Joseph Jay Deiss,1989-09-21 A vivid portrayal of life in Pompeii s sister city this book includes a detailed description of the ancient Villa dei Papiri on which the present Getty

Pompeian Households Penelope M. Allison, 2004-12-31 Studies of Pompeian material culture have traditionally been dominated by art historical approaches but recently there has been a renewed and burgeoning interest in Pompeian houses for studies of Roman domestic behavior This book is concerned with contextualized Pompeian household artifacts and their role in deepening our understanding of household behavior at Pompeii It consists of a study of the contents of thirty so called atrium houses in Pompeii to investigate the spatial distribution of household activities both within each architectural room type and across the house It also uses this material to investigate the state of occupancy of these houses at the time of the eruption of Mt Vesuvius in AD 79 It thus examines artifact assemblages within their spatial and decorative contexts for a more material cultural approach to these remains and for the information which they provide on living conditions in Pompeii during the last decades In this it takes a critical perspective the textual nomenclature which is traditionally applied to Pompeian room types

The Insula of the Menander at Pompeii Roger Ling, Penelope M. Allison, Paul R. Arthur, 1997 The Insula of the Menander is one of the most completely excavated city blocks in Pompeii with buildings ranging from small shops to large aristocratic houses This volume the third in a series of five volumes examining the Insula is the first ever comprehensive study of the contents of Pompeian houses and buildings within their original contexts It provides a great insight into living conditions in Pompeii during the final years of the city
