Shakespeare And The Geography Of Difference:

Shakespeare and the Geography of Difference John Gillies, 1994-05-12 Shakespeare's images of the exotic are shown to be firmly based on the margins of contemporary maps and examination of the icons and emblems of maps raises questions about the mapmakers' overt intentions and instinctive assumptions and reveals connections between the semiology of a map and that of the theater

Shakespeare's Ruins and Myth of Rome Maria Del Sapio Garbero, 2021-12-30 Rome was tantamount to its ruins a dismembered body to the eyes of those Italians and foreigners who visited the city in the years prior to or encompassing the lengthy span of the Renaissance Drawing on the double movement of archaeological exploration and creative reconstruction entailed in the humanist endeavour to resurrect the past ruins are seen as taking precedence over myth in Shakespeare's Rome They are assigned the role of a heuristic model and discovered in all their epistemic relevance in Shakespeare's dramatic vision of history and his negotiation of modernity This is the first book of its kind to address Shakespeare's relationship with Rome's authoritative myth archaeologically by taking as a point of departure a chronological reversal namely the vision of the eternal city as a ruinous scenario and hence the ways in which such a layered silent and aporetic scenario allows for an archaeo-anatomical approach to Shakespeare's Roman works
