tried to translate the results of our scholarly inquiry into pragmatic suggestions for officials and activists      The CAMPAIGN to SAVE OXLEAS WOOD David H Black,2021-12-04 The book concerns the history and rationale of the battle against the East London River Crossing to preserve Plumstead and the open spaces of Greenwich The campaign was successful in preventing the devastation of Oxleas Wood London s ancient woodland      **Localism and Neighbourhood Planning** Brownill, Sue,Bradley, Quintin,2017-01-18 As in many other areas of public policy in the United Kingdom in recent years city planning has increasingly been localized all the way down to the neighborhood level This book is the first to critically analyze this shift which has proved to be among the most contentious and controversial of all contemporary planning initiatives Focusing on the newly granted rights of communities to draw up statutory Neighbourhood Development Plans it moves from there to engage with larger debates about the theory and practice of localism setting this trend within an international context with cases from the United States Australia and France as well as the United Kingdom      *Politics and the Environment* James Connelly,Graham Smith,David Benson,Clare Saunders,2003-09-02 Politics and the Environment has established itself as the most comprehensive textbook in this area This new edition has been completely revised and updated while retaining the features and theory to practice focus which made the first edition so successful The book is designed to introduce students to the key concepts and issues vital to the understanding of environmental problems and their political solutions The authors investigate the people movements and organizations involved in the shaping of environmental policy and the barriers hindering the development and introduction of successful solutions to environmental problems This new edition has been expanded to include a reorganized structure divided into three thematic sections a wide range of case studies from around the world at the end of each chapter more boxed examples and concepts further detail on ecological modernization an extended further reading list including useful websites      **Mobility, Space and Culture** Peter Merriman,2012-07-26 Over the past ten to fifteen years there has emerged an increasing concern with mobility in the social sciences and humanities In Mobility Space and Culture Peter Merriman provides an important and timely contribution to the mobilities turn in the social sciences encouraging academics to rethink the relationship between movement embodied practices space and place The book takes an interdisciplinary approach drawing upon theoretical and empirical work from across the social sciences and humanities to provide a critical evaluation of the relationship between mobility and place site reformulating places as in process open and dynamic spatial formations Merriman draws upon post structuralist writings on space practice and society to demonstrate how movement is not simply practised or experienced in relation to space and time but gives rise to rhythms forces atmospheres affects and materialities which are often more crucial to embodied apprehensions of events than sensibilities of spatiality and temporality He draws upon detailed empirical research on experiences of and social reactions to driving in late Victorian and Edwardian Britain to trace how the motor car became associated with sensations of movement space and enmeshed with debates about embodiment health visuality gender and politics The book will be essential reading

Direct Action in British Environmentalism Brian Doherty, Matthew Paterson, Benjamin Seel, 2002-11 Direct Action in British Environmentalism is the fullest scholarly analysis available of this phenomenon It is essential reading for students of politics and environmental studies

Theatres of Memory Raphael Samuel, 2012-09-11 When Theatres of Memory was first published in 1994 it transformed the debate about what is to be considered history and questioned the role of heritage that lies at the heart of every Western nation's obsession with the past Today in the age of Downton Abbey and Mad Men we are once again conjuring historical fictions to make sense of our everyday lives In this remarkable book Samuel looks at the many different ways we use the unofficial knowledge of the past Considering such varied areas as the fashion for retrofitting the rise of family history the joys of collecting old photographs the allure of reenactment societies and televised adaptations of Dickens Samuel transforms our understanding of the uses of history He shows us that history is a living practice something constantly being reassessed in the world around us

**Finding a Role?** Brian Harrison, 2011-09-09 In 1970 the cold war was still cold Northern Ireland's troubles were escalating the UK's relations with the EEC were unclear and corporatist approaches to the economy precariously persisted By 1990 Communism was crumbling world wide Thatcher's economic revolution had occurred terrorism in Northern Ireland was waning multi culturalism was in place family structures were changing fast and

British political institutions had become controversial Seven analytic chapters pursue these changes and accumulate rich detail on changes in international relations landscape and townscape social framework family and welfare structures economic policies and realities intellect and culture politics and government The concluding chapter ranges chronologically even more widely to bring out the interaction of past and present then asks how far the UK had by 1990 identified its world role Like Harrison's *Seeking a Role The United Kingdom 1951 1970 2009* the immediately preceding volume in this series *Finding a Role* includes a full chronological table and an ample index of names and themes This the first thorough wide ranging and synoptic study of the UK so far published on this period has two overriding aims to show how British institutions evolved but also to illuminate changes in the British people their hopes and fears values and enjoyments failures and achievements It therefore equips its readers to understand events since 1990 and so to decide for themselves where the UK should now be going

**Information Obesity** Andrew Whitworth, 2009-02-28 An exploration of information literacy and ICT skills education from the point of view of social and political theory The author incorporates theories to argue why the idea of information literacy is so important in the 21st century and also to develop teaching strategies to this end The book argues that only through expanding the range of information literacy education taking it beyond just formal school and university education and into homes friendship networks and workplaces can we construct an effective educational response to information technology in the 21st century Information literacy includes but transcends ICT skills and ultimately is about being politically socially and communicatively competent in an information society Although this is a book about education it argues that we need to start thinking of education as something done by families friends workmates and society as a whole as well as schools and colleges Each chapter introduces the readers to some social and political theory but in ways accessible to a lay audience To complement each section think tasks and practical exercises will help the readers apply the insights in their personal contexts
