Mountain Light:

The Brown Mountain Lights Wade Edward Speer, 2017-03-21 Mysterious nighttime lights near Brown Mountain in North Carolina's Pisgah National Forest have intrigued locals and visitors for more than a century. The result of a three year investigation, this book identifies both manmade and natural light sources including some unexpected ones behind North Carolina's most famous ghost story. History, science, and human nature are each found to play a role in the understanding and interpretation of the lights people see. **Backpacker**, 1998-05 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS enabled magazine and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature, and product innovation, has become the gold standard against which all other outdoor industry awards are measured.

Mountain Photography Philip R. I. Smith, 2004-05 Whether you use a film or digital camera, this book provides essential guidance for successful photography in the mountains. Philip encourages artistic experimentation and uses stunning examples of his own work to illustrate this important craft of visual communication. His tips on composition, perspective, cropping, lines, shapes, patterns, tones, and contrast, and capturing motion will inspire all amateur photographers. In addition, he provides advice on practical aspects such as how to choose a suitable camera and accessories, correct metering, while on snow and at high altitude, and most important, how to stay safe in precarious shooting situations. *Mountain Mysteries* Larry D. Thacker, 2006-11 A near obsessive pursuit of ghost stories and odd superstitions cranks up this serious study of Appalachian tales of the supernatural and their origin in both old world customs and real historical events. An effort to preserve and record one aspect of a dying way of life, the book relies on interviews and historic documents to search for the facts behind local lore of murder, witchcraft, and weird hauntings. Several campfire worthy ghost stories are recounted in their entirety, including The Swinging Gate of Fern Lake Hollow, and an unexpectedly large number of stories about aliens and UFOs provide an interesting comparison of three century old mysteries and those stirred up in comparatively recent times.

He is best remembered today for having given us a cornerstone examination of the legends of fantastic flying reptiles known as dragons. *The Dragon in China and Japan* contains the most interesting quotations concerning the dragon in China, systematically arranged, selected from the enormous number of passages on this fantastic animal in Chinese literature from the remotest eras down to modern times, notes, cryptozoologist.

Loren Coleman in his new introduction Coleman also praises the book's use of primary source material. If cryptozoologists are to study the Asian dragons of India, China, and Japan, it must not be done through the screen of today's New Age mentality. Scholarly level-headed examinations of living breathing reports of serpentine flying beasts, water-borne megafauna, and shadowy entities must be balanced with investigations of the legends and folktales of these dragons from Asian texts such as de Visser's here. This new edition, a replica of the 1913 first edition, complete with extensive notes in the original Asian alphabet, is part of Cosimo's Loren Coleman Presents series. LOREN COLEMAN is author of numerous books of cryptozoology including *Bigfoot: The True Story of Apes in America* and *Mothman and Other Curious Encounters*. **Annual Report of the**

Yagnob Valley - Nature, history, and chances of a mountain community development in Tadjikistan / Долина р. Ягноб - природа, история и возможности развития горной общины в Таджикистане A. Gunya, 2017-06-28

The Yagnob Valley represents in its upper part an example of isolated peripheral area very typical for highlands of Asia and especially for Tadjikistan where each mountain valley has its own unique ethnic and cultural style of life and land use structure highly adapted to natural conditions. The natural isolation of the Yagnob Valley was conducive to the preservation in its upper part of a unique ethnic group, the Yagnobis, whose language is very similar to the Ancient Sogdian language attributed to the East Iranian language group. A strict dependence of land use type on natural conditions and natural processes as well as the peripheral positions and low accessibility limited the development and application of new economic methods. The study is undertaken with respect to model of the existential space of Yagnobi community affecting land use risks and possibilities for survival. Within the limits of the existing structure of the natural resources use, there are four very important types of risks that threaten to destroy existing relationship between the natural environment and the local economy: agroclimatic risk, risk of slope processes, anthropogenic degradation, the social and political risk.
