**Presenting for Impact Workbook** Steve Joseph Reilly,2013-03-08 There isn't any real trick or special art to developing and delivering a credible professional presentation It just takes a couple of straightforward proven techniques and a little work The problem with other books on presentations is that they make suggestions and recommendations to try until you find your footing This book is different My techniques are different In the last 20 years of presenting to diverse groups in every industry on almost every continent I developed a set of presentation best practices that work they work not just for me but also for everyone who try them In my Presenting For Impact Workshop I coach people to use the skills of body language eye contact and gestures to project confidence I teach them to use my template for presentation organization to establish control over their audience and avoid being sidetracked And finally I teach them on using visual aids in a way that engages all three learning styles and ensures maximum engagement Now if you want to learn to present like Steve Jobs or Dale Carnegie this book will not help I don't focus on personality or projection or other intangibles But if you want very clear direction on the appropriate use of body language organization and PowerPoint this is for you While we can't all be a Tony Robbins we can be credible professional and succinct
