Brodsky, Thomas G. Gutheil, 2015

Psychologists psychiatrists and other mental health professionals may be experts in their respective fields but this expertise does not easily translate to effective courtroom testimony Even veteran expert witnesses can encounter new challenges in these high pressure situations especially during a cross examination where every statement and gesture can be scrutinized by an attorney searching for ways to dispute the expert's credibility and opinions For more than two decades Stanley Brodsky has taught expert witnesses simple and practical strategies they can use to negotiate challenges in the courtroom and give strong effective testimony In this thorough update to his classic guide Brodsky and his equally prolific coauthor Thomas Gutheil continue to provide sage humorous advice that will put expert witnesses at ease and allow them to comport themselves with poise and confidence throughout direct and cross examination Short chapters punctuated by memorable

Candilis, Robert Weinstock, Richard

Martinez, 2007-08-19 Why a book about the ethics of forensic psychiatry and related disciplines Most psychiatrists after all learn something in their training about the ethics of medical practice in general and of the practice of psychiatry in particular Do the maxims that steer all physicians through the ethical complexities of clinical medicine not provide equally effective guidance to clinical and scientific expert witnesses The answer in short is No When psychiatrists for example enter the realm of the expert witness they tread on moral terrain with a significantly different topography than the paths to which they are accustomed in their clinical roles Clinical psychiatrists owe primary allegiance to their patients interests for them the principles of beneficence doing good and non maleficence avoiding harm will generally take priority over all other considerations For psychiatrists who serve as experts however there are no patients to whom fidelity is due There are only persons being evaluated for the sake of providing opinions to third parties Perhaps a defendant in a criminal case a plaintiff in a tort action or a claimant in an adjudication of disability benefits or workers compensation but not a patient And that makes all the difference Whatever its other virtues no theory of the ethics of forensic psychiatry will serve its purpose unless it offers the psychiatric expert direction in dealing with this situation
