Radiation Therapy Physics Alfred R. Smith, 2013-11-11 The aim of this book is to provide a uniquely comprehensive source of information on the entire field of radiation therapy physics The very significant advances in imaging computational and accelerator technologies receive full consideration as do such topics as the dosimetry of radiolabeled antibodies and dose calculation models The scope of the book and the expertise of the authors make it essential reading for interested physicians and physicists and for radiation dosimetrists     Cancer, Radiation Therapy, and the Market Barbara Bridgman Perkins, 2017-08-16 Appraising cancer as a major medical market in the 2010s Wall Street investors placed their bets on single technology treatment facilities costing 100 300 million each Critics inside medicine called the widely publicized proton center boom crazy medicine and unsustainable public policy There was no valid evidence they claimed that proton beams were more effective than less costly alternatives But developers expected insurance to cover their centers staggeringly high costs and debts Was speculation like this new to health care Cancer Radiation Therapy and the Market shows how the radiation therapy specialty in the United States later called radiation oncology coevolved with its device industry throughout the twentieth century Academic engineers and physicians acquired financing to develop increasingly powerful radiation devices initiated companies to manufacture the devices competitively and designed hospital and freestanding procedure units to utilize them In the process they incorporated market strategies into medical organization and practice Although palliative benefits and striking tumor reductions fueled hopes of curing cancer scientific research all too often found serious patient harm and disappointing beneficial impact on cancer survival This thoroughly documented and provocative inquiry concludes that public health policy needs to re evaluate market driven high tech medicine and build evidence based health care systems     **Khan's The Physics of Radiation Therapy** Faiz M.
