Sustainable Communities Hugh Barton, 2013-12-02 This book re addresses the concepts of neighbourhood and community in a refreshing and challenging way It will be of immense benefit not only to town planners but also to all those professional and voluntary groups and politicians who seek to create the new communities of tomorrow From the Foreword by Jed Griffiths Past President of the Royal Town Planning Institute There is widespread support for the principle of creating more sustainable communities but much hazy wishful thinking about what this might mean in practice In reality we witness more the death of local neighbourhoods than their creation or rejuvenation reflecting an increasingly mobile privatized and commodified society Sustainable Communities examines the practicalities of re inventing neighbourhoods It is neither an idealistic utopian tract nor a designer's manual but is rather a serious attempt to address the real issues This collection of expert contributions examines the nature of local community and methods of building social capital presents the findings of a world wide survey of eco neighbourhoods and eco villages with case studies from the United Kingdom Europe America and Australia develops a fresh perspective on the planning and design of neighbourhoods in urban areas based on the eco system approach explores practical programmes for local resource management and the implications for community based decision making provides a detailed appendix listing current eco village and eco neighbourhood schemes by country Written by an interdisciplinary team of social and environmental scientists town planners and urban designers this is a thought provoking and important contribution to both the theory and practice of the development of sustainable communities
