Advances in Perinatal Medicine Aubrey Milunsky, 2012-12-06 The state of health care is reflected by perinatal and neonatal morbidity and mortality as well as by the frequencies of long term neurological and developmental disorders Many factors some without immediately recognizable significance to childbearing and many still unknown undoubtedly contribute beneficially or adversely to the outcome of pregnancy Knowledge concerning the impact of such factors on the fetus and surviving infant is critical Confounding analyses of pregnancy outcome especially these past 2 or 3 decades are the effects of newly undertaken invasive or inactive therapeutic approaches coupled with the advent of high technology Many innovations have been introduced without serious efforts to evaluate their impact prospectively and objectively The consequences of therapeutic misadventures characterized the past it seems they have been replaced to a degree by some of the complications of applied technology Examples abound after overuse of oxygen was recognized to cause retrolental fibroplasia its restriction led to an increase in both neonatal death rates and neurologic damage in surviving infants Administration of vitamin K to prevent neonatal hemorrhagic disease particularly when given in what we now know as excessive dosage occasionally resulted in kernicterus Prophylactic sulfonamide use had a similar end result More recent is the observation of bronchopulmonary dysplasia as a complication of respirator therapy for hyaline membrane disease The decade of the eighties opened with the all time highest rate of cesarean section in the United States

Neonatal Respiratory Distress Philip M Farrell, 2013-09-03 Lung Development Biological and Clinical Perspectives Volume II Neonatal Respiratory Distress is a collection of papers that addresses the needs of small infants who have respiratory diseases This volume deals with fetal lung development with emphasis on hyaline membrane disease This book also presents basic information on pulmonary surfactant in the clinical area particularly in 1 diagnosis and movement of neonatal respiratory distress 2 prenatal assessment of fetal lung maturity and 3 prevention of hyaline membrane disease with corticosteroid therapy One paper reviews the essential clinical aspects of hyaline membrane disease while another paper discusses data of the physiology of surfactant from a patient with hyaline membrane disease Another paper examines the radiology of hyaline membrane disease transient tachypnea of the newborn and bronchopulmonary dysplasia this paper also describes the radiographic techniques to be applied on infants Other papers cite a treatment using antepartum glucocorticoid as well as other clinical trials involving

antenatal corticosteroid One paper proposes a design and organization of a multicenter clinical trial that will study the effects of corticosteroid in the development of the human lung This book can prove useful for pediatricians specialists in respiratory diseases and researchers whose work involves cardiovascular medicine and radiology **Diagnostic Radiology**
