Air Power in the Nuclear Age, 1945-84 M.J. Armitage, R. A. Mason, 1985-09-20 **The Aeroplane**, 1954 **The Aeroplane and Commercial Aviation News**, 1954 *Technical and Military Imperatives* L Brown, 1999-01-01 Technical and Military Imperatives A Radar History of World War II is a coherent account of the history of radar in the second World War Although many books have been written on the early days of radar and its role in the war this book is by far the most comprehensive covering ground air and sea operations in all theatres of World War II The author manages to synthesize a vast amount of material in a highly readable informative and enjoyable way Of special interest is extensive new material about the development and use of radar by Germany Japan Russia and Great British The story is told without undue technical complexity so that the book is accessible to specialists and nonspecialists alike *Electronic Warfare* J. P. R. Browne, Michael T. Thurbon, 1998 Part of the Brassey's Air Power series this book fully assesses the role of electronic warfare in the air with the story of its development and initial applications together with a look at the nature of the technology involved **RAF Fighter Command** Ron Mackay, 2019-11-03 Royal Air Force Fighter Command's brief was to provide an effective aerial barrier to any attempt at domination of British skies The aircraft and technical resources on hand between 1936 and WWII's initiation were thankfully improved to a level that was barely sufficient to withstand the hitherto unchallengeable Luftwaffe's advance across Western Europe Between 1940 and 1942 the Command generally found itself on the back foot in terms of overall success The introduction of aircraft designs that would change the situation however costly in its ultimate favour featured prominently from the mid point of WWII The Luftwaffe found itself being challenged and regularly bested round the clock by the advent of D Day the Command's efforts had materially contributed to the Allied on surge that had placed its adversary on a permanent downward spiral towards total extinction [Fighter Command, 1936-1968](#) Ken Delve, 2007-08-16 This is a comprehensive reference to the structure operation aircraft and men of Fighter Command from its formation in 1936 to 1968 when it became part of Strike Command It includes descriptions of many notable defensive and offensive campaigns the many types of aircraft used weapons and airfields The main sections of the book include a general historical introduction and overview operations operational groups aircrew training and technical details of each aircraft type Lengthy Annexes cover personnel the squadrons in World War II orders of battle for each wartime year maps of airfield locations and numbers of enemy aircraft downed [Radar and Electronics](#), 1960 **Life** Henry R. Luce, 1941-07 **Royal Air Force Fighter Command Losses of the Second World War** Norman L. R. Franks, 1997-04-24 In August 1939 on the eve of war with Germany Britain was ill prepared and Fighter Command could muster only 37 operational squadrons to face the foe Following a brief campaign in Norway and the brave but disastrous Battle of France and retreat through Dunkirk Britain stood alone waiting [Royal Air Force Fighter Command Losses of the Second World War](#) Norman L. R. Franks, 1997 The first in a series of volumes which provide an account of the sacrifices

made by RAF Fighter Command during the early years of the Second World War **Royal Air Force Fighter Command**

Losses of the Second World War Norman L.R. Franks, 1998 Oversigter over tabene af flybesætninger og fly ved RAF Fighter Command under 2 verdenskrig i de anførte tidsperioder *Bomber Command's War Against Germany* An Official History, 2020-12-14 The internal RAF analysis of the different phases of the air war and what lessons could be learnt from those campaigns Royal Aeronautical Society website When the RAF's Bomber Command analyzed the results of their precision bombing efforts during the early years of World War II a growing body of evidence indicated that the great knockout blow expected to be delivered from the air was a fantasy It would only be through a prolonged campaign of attrition that the enemy could be worn down to such a degree that morale the means of production and the infrastructure of the enemy would be degraded to the point where its fighting ability was crippled The result of this assessment was a change of policy from precision bombing of carefully identified key installations to area bombing with the declared intent of striking at the homes of the German workers the factories where they worked regardless of the nature of such establishments or of the civilian casualties that would be the inevitable consequence In compiling this official analysis of the effectiveness of the RAF's strategic bombing campaign the author was granted unrestricted access to Air Ministry Cabinet and other relevant departmental documents that were maintained for internal government use enabling him to gain a complete and unbiased assessment of the contribution made by Bomber Command to the defeat of Germany The conclusion he draws fully justifies the decisions taken by both Britain and the USA to bomb the German people into surrender **RAF Fighter Command**

Losses of the Second World War Norman L. R. Franks, *The RAF's Cross-Channel Offensive* John Starkey, 2023-01-05 The story of the RAF and in particular Fighter Command during the Battle of Britain has been told many times It is a tale of the gallant pilots of The Few in their Hurricanes and Spitfires with the nation's back to the wall fighting off the Luftwaffe's airborne assault against enormous odds But the story of Fighter Command's operations immediately after the Battle of Britain is less well known Marshal of the Royal Air Force Hugh Montague Trenchard commanded the Royal Flying Corps in the First World War His policy then had been for his aircraft and men to be continually on the offensive always over the German lines taking the fight to the enemy After being promoted to command the RAF Trenchard retired in 1930 In November 1940 Trenchard showed up again at the Air Ministry and proposed that the RAF should Lean Towards France that it should go on the offensive The RAF would claimed Trenchard win the resulting battle of attrition One of the main outcomes of the RAF's new offensive stance was the introduction of the Circus sorties These were attacks undertaken by a small force of bombers with a powerful fighter escort They were intended to lure enemy fighters into the air so that they could be engaged by RAF fighters the primary objective being the destruction of Luftwaffe fighters followed by the protection of the bombers from attack A further development of the Circus missions were Ramrods Rhubarbs and Rodeos all of which were variations on the same theme A Ramrod was similar to a Circus though in this instance the primary objective was the

destruction of the target the main role of the accompanying fighters being to protect the bombers from attack A Rhubarb was a small scale attack by fighters using cloud cover and or surprise the object of which was to destroy German aircraft in the air and or striking at ground targets while a Rodeo consisted of a fighter sweep over enemy territory with no bombers Drawing on official documents and archive material as well as accounts by many of those involved James Starkey reveals just how Trenchard s views won through and the RAF went on the offensive from late 1940 into 1941 Was it a failed strategy If so why was it not halted once the results began to be seen

Fighter Commands Air War, 1941 Norman Franks, 2016-10-14 An extensive history of the Royal Air Force s Circus offensive against Nazi Germany in World War II by the author of Jasta Boelcke Following the Battle of Britain the RAF started taking the air war to the Germans A small number of bombers escorted by large numbers of fighters tried to force the Luftwaffe into battle Much air combat ensued but it was not until Germany invaded Russia in June 1941 that operations were stepped up in an effort to take pressure off Stalin s Russian Front Two major German fighter groups JG26 and JG2 were however more than able to contain the RAF s operations generally only intercepting when conditions were in their favor As author Norman Franks describes over claiming combat victories by pilots of both sides is amazing and several of the top aces had inflated scores Fighter Command however lost massively even though they believed they were inflicting equal if not better losses on the Luftwaffe This battle of attrition was virtually a reverse of the 1940 battles over England and pilots who had to bail out over France were lost completely The book covers the 100 Circus operations and their accompanying fighter sweeps in detail while also mentioning lesser operations where the RAF were concerned The tactics employed by both sides are examined and show how each fighter force quickly adapted to changing conditions tempered by experiences gained in air combat

RAF Bomber Command: 'Strike Hard, Strike Sure' 1936-1945 Ron Mackay, 2022-03-31 Historically rich in detail with previously unpublished photographs from private archives Researched and written by an aviation and military historian renowned author Essential for military historians modellers flight sim enthusiasts War Thunder IL 2 Sturmovik Great Battles and DCS and those interested in the complexities of aircraft design and production during the Second World War They sowed the wind and now they are going to reap the whirlwind Arthur Bomber Harris The concept of an aerial campaign on a nation s industrial and military might was advocated by Britain before the start of the First World War however a stringent post war economy ensured that the creation of Bomber Command in 1936 witnessed a daunting disparity between the aim of striking at an adversary s ability to sustain itself and the means to do so From 1939 to 1942 Bomber Command was very weak in terms of human and material losses The navigational means with which to

accurately guide bombers to targets was almost completely lacking while the enemy defensive network inflicted serious casualties. Consequently the punishment handed out was minimal. The resurgence of Bomber Command's fortunes coincided with the appointment of Sir Arthur Harris. The advent of four engine designs such as the Avro Lancaster and Handley Page Halifax ensured that a greatly increased bomb tonnage could be delivered. Also electronic aids such as Gee, Oboe and H2S simplified the task in finding targets. Therefore by 1944-1945 the RAF's bombers pulverised Hitler's Third Reich. Although flak and night fighters took a heavy toll on the bombers, the RAF's nocturnal offensive in conjunction with the USAAF's daylight assaults crippled Germany's ability to fight back.
