Railways at the turn of the century, 1895-1905 Oswald Stevens Nock,1969      **Historical Atlas of Canada: The land transformed, 1800-1891** Geoffrey J. Matthews,Don Measner,1987-01-01 Uses maps to illustrate the development of Canada from the last ice sheet to the end of the eighteenth century      *Monorails of the 19th Century* Adrian S. Garner,2011      **The Railway Journey** Wolfgang Schivelbusch,2014-05-06 The impact of constant technological change upon our perception of the world is so pervasive as to have become a commonplace of modern society But this was not always the case as Wolfgang Schivelbusch points out in this fascinating study our adaptation to technological change the development of our modern industrialized consciousness was very much a learned behavior In *The Railway Journey* Schivelbusch examines the origins of this industrialized consciousness by exploring the reaction in the nineteenth century to the first dramatic avatar of technological change the railroad In a highly original and engaging fashion Schivelbusch discusses the ways in which our perceptions of distance time autonomy speed and risk were altered by railway travel As a history of the surprising ways in which technology and culture interact this book covers a wide range of topics including the changing perception of landscapes the death of conversation while traveling the problematic nature of the railway compartment the space of glass architecture the pathology of the railway journey industrial fatigue and the history of shock and the railroad and the city Belonging to a distinguished European tradition of critical sociology best exemplified by the work of Georg Simmel and Walter Benjamin *The Railway Journey* is anchored in rich empirical data and full of striking insights about railway travel the industrial revolution and technological change Now updated with a new preface *The Railway Journey* is an invaluable resource for readers interested in nineteenth century culture and technology and the prehistory of modern media and digitalization      The Development of Railway Technology in East Asia in Comparative Perspective Minoru Sawai,2017-07-09 This is the first book to examine the process of railway development in Japan Korea Taiwan and China from historical and comparative perspectives Moreover it discusses and compares the East Asian experiences of railway development with cases in Germany which was a mainstay of railway development in Europe After the opening of Japan in the mid nineteenth century the country achieved import substitution of locomotives in half a century This book explores the social capability of Meiji Japan to overtake the advanced countries in railway technology Parallel with the expansion of the Japanese empire a large team of engineers constructed and operated the colonial government railways of Taiwan and Korea and the South Manchuria Railway The book clearly outlines the education and training of these engineers The management capabilities of the colonial railways and South Manchuria Railway were transferred to the postwar period and such expertise supported the economic development of each country and region These dramatic East Asian experiences of railway development are compared with European cases mainly German railways      **The Railway Journey** Wolfgang Schivelbusch,1979      *Economy and Society in 19th Century Britain* Richard Tames,2013-11-05 In 1801 the population of Great Britain was 10 6 million by 1901 it was 37 1

million The national product in 1801 has been valued at 138 000 000 by 1901 it was 1 948 000 000 The rise per head was from 12.9 to 52.5 and as these figures represent constant prices the rise in material standards is evident even allowing for the unequal distribution of socially created wealth This book is a short crisp survey of the major economic and social developments in nineteenth century Britain It combines a brief narrative history with a lucid and exciting synthesis of all the important problems and academic controversies The chapters discuss economic growth population its growth impact and movement urbanisation and the housing problem industry agriculture transport overseas trade and foreign investment life and labour education finance the role of government and the social structure The text is extensively subdivided for easy reference and is illustrated with numerous tables and diagrams There is a full critical bibliography at the end of each chapter and a chronological table of events at the end of the book

**Railway Development** Frank Bruinsma, Eric Pels, Hugo Priemus, Piet Rietveld, Bert van Wee, 2007-12-22 The revitalisation of railway station areas has been a hot issue in policy making in Europe in recent years The introduction of two new railway systems the high speed train and light rail systems has pushed forward the redevelopment of not only railway stations themselves but also of their in many cases deteriorated direct surroundings Examples of revitalisation of railway station areas can be found throughout Europe for example in countries like England Liverpool France Euralille Germany Berlin and the Netherlands Amsterdam South Axis The dynamics of revitalisation of railway station areas can best be understood by combining the sights of several disciplines economics and spatial sciences being the most important disciplines This book therefore addresses the subject from a multi disciplinary perspective Railway station area redevelopment projects try to cope with the creased lack of interoperability and interconnectivity between infrastructures and boost the local regional economy by creating a new high quality multifunctional urban landscape at the same time At present the initial outcomes with the transformation of deteriorated railway station areas into modern mixed office shopping and residential areas seems hopeful but what are the prospects of those redeveloped areas Most of the papers contained in this volume were presented at the special session Railway stations and urban dynamics of the 45 conference of the European Regional Science Association ERSA held in Amsterdam the Netherlands during August 2005

**The Laboratory of Progress** Joseph Jung, 2022-09-16 The Laboratory of Progress Switzerland in the 19th Century tells the improbable story of how a small backward mountainous agricultural country with almost no raw materials became an industrial powerhouse a hub of innovation a touristic mecca and a pioneer in transportation all in the course of a single century That a tiny landlocked country should become a dominant steamship builder for the rest of the world that a country that had never seen a cotton plant should become the world's second largest textile producer that a country with hardly any level terrain should come to boast the world's most highly developed railway network and that a country whose main export was impoverished emigrants should be transformed into one of the world's major financial centres these astonishing developments among many others are explored and explained both through the specific stories of individual innovators and

through a prescient analysis of the political economic societal and cultural structures that formed the context in which Switzerland's astonishing transformation took place. The book is a compelling read both for professional historians and for general readers with an interest in Switzerland; it highlights the roles of transport networks and individual pioneers in industrial and political development. *Handbook on Railway Regulation* Matthias Finger, Juan Montero, 2020-09-25 Taking a global approach, this insightful Handbook brings together leading researchers to provide a comprehensive overview of the state of the art in railway regulation with a particular focus on countries that rely heavily on railways for transportation links. The Handbook also considers the most pressing issues for those working in and with railway systems and outlines future trends in the development of rail globally.

**The House of Tata Meets the Second Industrial Revolution** Chikayoshi Nomura, 2018-04-12 This monograph aims to analyze the economic and business history of colonial India from a corporate perspective by clarifying the historical role of institutional developments based on archival evidence of a representative enterprise. The perspective is distinctively unique in that it highlights the salience of corporate level institutional responses to explain the causes of colonial India's industrial growth in addition to two renowned perspectives focusing on government economic policy or factor endowment. One of the driving forces of India's high growth rate since the 1980s is the expansion of modern business corporations whose origins date back to the colonial era in the mid nineteenth century. This monograph explores the historical foundation of the growth of such corporations in colonial India guided by a substantial collection of documents of Tata Iron and Steel Company whose rich records have not received the due attention they have long deserved. As clarified by numerous economic and business historians of leading industrialized countries since the works of Douglass North and Alfred Chandler, this study as well proposes that the development of modern business corporations in colonial India was broadly supported by the reciprocal evolution of economic institutions and corporate organizations. Adding a new perspective to the business and economic history of colonial India, the analysis also provides an important case study of the development of corporate business in the non Western world to the study of global business history.

Suburbanizing the Masses Colin Divall, Winstan Bond, 2017-09-29 This title was first published in 2003. Suburbanizing the Masses examines how collective forms of transport have contributed to the spatial and social evolution of towns and cities in various countries since the mid nineteenth century. Divided into two sections, the volume develops first the classic tradition on transport and the city public transport's impact on urban development. The contextualisation of transport is one important factor in the historical debates surrounding urban development. As well as analysing the discourse employed by urban political and business elites in favour of public transport, these contributions show the degree to which practice often fell short of ideals. The second section tackles the professional paradigms of urban transport, the circulation of traffic in cities and the technological modes appropriate to its realization. In particular, these contributions explore the paradigms held by professional planners and managers and the political classes associated with them. From a variety of perspectives, Suburbanizing the Masses

demonstrates the continuing relevance of socio historical inquiry on the relationship between public transport and urban development By differentiating between the many roles of urban transport in the nineteenth century it confirms that public transport was not directly linked to urban growth and instead often had only a limited effect on the wider urban structure Suburbanizing the Masses forces a reassessment of the received historiography that maintains cheap public transport was essential to the spectacular growth of cities in the nineteenth century *Railways At the Turn of the Century, 1895-1905, By O.S.
