Rain Of Iron And Ice The Very Real Threat Of Comet And Asteroid Bombardment:

Rain Of Iron And Ice John S. Lewis,1996-01-10 John S Lewis a planetary scientist details the recent scientific study which suggests that massive solid bodies from space pose a very real threat to our planet and explores the implications for the future of life on Earth

Rain Of Iron And Ice John S. Lewis,1997-04-25 Rain of Iron and Ice shows us the unmistakable evidence from spaceprobe flybys of the planets to the scars on our own Earth of cataclysmic comet and asteroid impacts By comparing what we know about the earth s geology and paleontology with the ages of the other planets and moons in our solar system Lewis makes the strongest case yet for sudden dramatic extinctions and assesses the risks to planet Earth

Solving the Mystery of the Biblical Flood William Scott Anderson,2001-11 This is a very unique book that for the first time puts forth a new theory on how a recent global flood as described in the Bible may have occurred that is both plausible and scientifically sound The author treats Noah s flood as a scientific mystery story which he then proceeds to solve by examining the clues found in the geological record and human history building a theory that is in harmony with the biblical record of an earth wide deluge and with what we know about the geology of the earth In this detailed and well referenced book common objections to the biblical deluge are examined and answers are found that satisfy both a literal interpretation of scripture and a scientific examination of the facts This book is compelling as the author proves what many have come to view as mere myth is actually a historical event well supported by scientific evidence The author also presents the results of his research on detecting recently deposited micro marine fossils left by the flood in soil samples Presenting solid Paleoclimatological evidence of the deluge this book may require rewriting many currently used textbooks Sure to be considered very controversial this is a must read for any one interested in geology or the biblical deluge Written for the general public and the more geologically inclined as well this book is a seamless merging of a literal reading of Genesis with what geology knows about the earth 305 pages 20 B W illustrations index

Solving the Mystery of the Biblical Flood WM. Controversy Catastrophism and Evolution Trevor Palmer, 2012-12-06 In *Controversy* Trevor Palmer fully documents how traditional gradualistic views of biological and geographic evolution are giving way to a catastrophism that credits cataclysmic events such as meteorite impacts for the rapid bursts and abrupt transitions observed in the fossil record According to the catastrophists new species do not evolve gradually they proliferate following sudden mass extinctions Placing this major change of perspective within the context of a range of ancient debates Palmer discusses such topics as the history of the solar system present day extraterrestrial threats to earth hominid evolution and the fossil record The Son Cometh Volume I Brian D. Baldemor, 2024-12-15 From the rise of Herod ca 44 BCE to the destruction of Jerusalem 70 CE *The Son Cometh* is an exegetical systematic and historical study chronicling several religious and political strands central to the life and ministry of Jesus Christ As an exposition of the Christian faith this work not only apologetically and evangelistically endeavors to provide the reader with the historical context and approximate timeline for the writing of the New Testament canon e g the Synoptic Gospels John Acts Revelation and other apostolic epistles but also a background to the Law and Prophets as foreshadows and types leading up to the fullness of time including extensive references and citations of other Jewish Roman and Christian primary sources e g Philo Josephus and Eusebius **The End of the Dinosaurs** Charles Frankel, 1999-09-23 *The End of the Dinosaurs* gives a detailed account of the great mass extinction that rocked the Earth 65 million years ago and focuses on the discovery of the culprit the Chicxulub impact crater in Mexico It recounts the birth of the cosmic hypothesis the controversy that preceded its acceptance the search for the crater its discovery and ongoing exploration and the effect of the giant impact on the biosphere Other mass extinctions in the fossil record are reviewed as is the threat of asteroids and comets to our planet today The account of the impact and its aftermath is suitable for general readers The description of the crater geology is in enough detail to interest students of the earth sciences A detailed index

and bibliography are included *Late Cretaceous and Cenozoic History of North American Vegetation* Alan Graham, 1999-03-25 This book is a unique and integrated account of the history of North American vegetation and paleoenvironments over the past 70 million years It includes discussions of the modern plant communities causal factors for environmental change biotic response and methodologies The history reveals a North American vegetation that is vast immensely complex and dynamic **Dark Skies** Daniel Deudney, 2020-03-02 Dark Skies provides the first comprehensive and balanced assessment of the space enterprise past present and future It demolishes widely held optimistic assumptions about the desirability of many major space activities actual and prospective Most consequentially the hiding in plain sight use of outer space as a corridor for long range bombardment has increased the probability of catastrophic nuclear war Contrary to the widespread claim that sustainable colonies on other celestial bodies are necessary for human survival from large scale disasters on Earth Dark Skies shows that colonization itself poses many severe threats and should be avoided Instead an Earth oriented space program should be pursued *The Mars Mystery* Graham Hancock, 2010-08-11 An asteroid transformed Mars from a lush planet with rivers and oceans into a bleak and icy hell Is Earth condemned to the same fate or can we protect ourselves and our planet from extinction In his most riveting and revealing book yet Graham Hancock examines the evidence that the barren Red Planet was once home to a lush environment of flowing rivers lakes and oceans Could Mars have sustained life and civilization Megaliths found on the parched shores of Cydonia a former Martian ocean mirror the geometrical conventions of the pyramids at Egypt's Giza necropolis Especially startling is a Sphinx like structure depicting a face with distinguishable diadem teeth mouth and an Egyptian style headdress Might there be a connection between the structures of Egypt and those of Mars Why does NASA continue to dismiss these remarkable anomalies as a trick of light Hancock points to the intriguing possibility that ancient Martian civilization is communicating with us through the remarkable structures it left behind In exploring the possible traces left by the Martian civilization and the cosmic cataclysm that may have ended it *The Mars Mystery* is both an illumination of our ancient past and a warning that we still have time to heed about our ultimate fate Life's Solution Simon Conway Morris, 2003-09-04 The assassin's bullet misses the Archduke's carriage moves forward and a catastrophic war is avoided So too with the history of life Re run the tape of life as Stephen J Gould claimed and the outcome must be entirely different an alien world without humans and maybe not even intelligence The history of life is littered with accidents any twist or turn may lead to a completely different world Now this view is being challenged Simon Conway Morris explores the evidence demonstrating life's almost eerie ability to navigate to a single solution repeatedly Eyes brains tools even culture all are very much on the cards So if these are all evolutionary inevitabilities where are our counterparts across the galaxy The tape of life can only run on a suitable planet and it seems that such Earth like planets may be much rarer than hoped Inevitable humans yes but in a lonely Universe
