Retreat From Doomsday:

Retreat from Doomsday John Mueller, *Retreat From Doomsday* John Mueller, 1990-07-17 *Theories of War and Peace* Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 1998-09-15 New approaches to understanding war and peace in the changing international system What causes war How can wars be prevented Scholars and policymakers have sought the answers to these questions for centuries Although wars continue to occur recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and prevention of war This volume includes essays by leading scholars on contemporary approaches to understanding war and peace The essays include expositions analyses and critiques of some of the more prominent and enduring explanations of war Several authors discuss realist theories of war which focus on the distribution of power and the potential for offensive war Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace In light of the apparent increase in nationalism and ethnic conflict several authors present hypotheses on how nationalism causes war and how such wars can be controlled Contributors also engage in a vigorous debate on whether international institutions can promote peace In a section on war and peace in the changing international system several authors consider whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war **Bulletin of the Atomic Scientists**, 1989-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *The Cold War and After* Sean M. Lynn-Jones, Steven E. Miller, 1993 The Cold War and After presents a collection of well reasoned arguments selected from the journal International Security on the causes of the Cold War and the effect of its aftermath on the peaceful coexistence of European states This new edition includes all of the material from the first edition plus four new articles The Unipolar Illusion Why New Great Powers Will Rise Christopher Layne International Primacy Is the Game Worth the Candle Robert Jervis Why International Primacy Matters Samuel P. Huntington and International Relations Theory and the End of the Cold War John Lewis Gaddis Sean M. Lynn Jones is Managing Editor of International Security Steven E. Miller is Director of Studies at the Center for Science and International Affairs Harvard University **The Bomb** Beatrice Heuser, 2014-09-25 This tightly argued and profoundly thought provoking book tackles a huge subject the coming of the nuclear age with bombing of Hiroshima and Nagasaki in August 1945 and the ways in which it has changed our lives since Dr Heuser sets these events in their historical context and tackles key issues about the effect of nuclear weapons on modern attitudes to conflict and on the ethics of warfare Ducking nothing she demystifies the subject seeing the bomb not as something unique and paralysing but as an integral part of the strategic and moral context of our time For a wide multidisciplinary and general readership **Parameters**, 1990 **Paradigm Lost?** David Jablonsky, 1993 After every momentous event there is usually a transition period in which participants in the events

whether individuals or nation states attempt to chart their way into an unfamiliar future In the United States in this century there are three such transitions each focused on America's role in the international arena After World War I the American people specifically rejected the global role for the United States implicit in Woodrow Wilson's strategic vision of collective security In contrast to this return to normalcy after World War II the United States moved inexorably toward international leadership in response to the Soviet threat The result was an acceptance of George Kennan's strategic vision of containing the Soviet Union on the Eurasian landmass and the subsequent bipolar confrontation of the two superpowers in a twilight war that lasted for over 40 years Sometime in the penultimate decade of the 20th century the United States and its allies won the cold war Once again in the current transition period the primary questions revolve around the management of power and America's role in global politics Once again there are the issues of change and continuity In terms of change the cold war set in train a blend of integrative and disintegrative forces and trends that are adding to the complex tensions of the current transition The integrative force that increasingly linked global economies in the cold war for instance also holds out the spectral potential of global depression or at the very least nations more susceptible to disintegrative actions as the Iraqi invasion of Kuwait demonstrated In a similar manner the advances in communications and transportation that have spread the results of medical and scientific discoveries around the world are countered by the malign transnational results of nuclear technology the drug trade terrorism AIDS and global warming

Hegemony John Agnew, 2005-04-08 *Hegemony* tells the story of the drive to create consumer capitalism abroad through political pressure and the promise of goods for mass consumption In contrast to the recent literature on America as empire it explains that the primary goal of the foreign and economic policies of the United States is a world which increasingly reflects the American way of doing business not the formation or management of an empire Contextualizing both the Iraq war and recent plant closings in the U S noted author John Agnew shows how American hegemony has created a world in which power is no longer only shaped territorially He argues in a sobering conclusion that we are consequently entering a new era of global power one in which the world the US has made no longer works to its singular advantage

Communitarian International Relations Emanuel Adler, 2005 Emanuel Adler is one of the leading IR theorists of his generation This volume brings together a collection of his articles including four new and previously unpublished chapters
