The Return To Europe NA NA,2016-04-30 The Return to Europe examines the ability of the Central and South east European economies to withstand competitive pressures on entry to the EU These economies are still experiencing major structural problems inherited from communism A major gap still exists between the income levels and economic structures of the accession states and the existing members of the EU Trade relations largely involve the exchange of labour intensive goods produced in Eastern Europe for technology intensive goods produced in the EU The export structures of some Central European economies which have attracted foreign direct investment is improving Romania and Bulgaria have become increasingly dependent on export of labour intensive goods since the collapse of communism Will this create a permanent division of labour in an enlarged EU in which some regions of Europe fail to attract investment and become dependent on the export of low wage goods with implications for European security The Return to Europe ,2000 *The Return to Europe*

countries in Western Europe Belgium France West Germany Italy Luxembourg and the Netherlands decided to take economic cooperation to the next level The vision of the EU founding states epitomized by the Schuman Declaration in 1950 was to tie their economies so closely together that war would become impossible Robert Schuman author of the plan believed Europe could not be made all at once or according to a single plan It would have to be built through concrete achievements which first create a de facto solidarity The countries within the European Community benefited enormously from free trade

and common economic policies in particular structural funds designed to foster convergence by funding infrastructure and investments in poorer regions This book examines how similar transitions and integration into the European Union are experienced in individual central and eastern European states through the use of country scans in the regional blocks of CEE SEE and CIS

How Do Small States Affect the Future Development of the E.U. Moosung Lee, 2006 The beginning of the 21st century witnessed an unprecedented expansion of the EU Since the majority of new member countries are small there is a conventional wisdom that the accession of these states has the potential to create challenges to the development of the enlarged EU This book attempts to argue that this view may not be the case

Transnational Politics of the Environment Liliana B. Andonova, 2003-11-21 A study of the effect of EU membership on Central and Eastern European environmental policy and the interplay of political incentives and industry behavior that determines policy In Transnational Politics of the Environment Liliana Andonova examines the effect of the European Union EU on the environmental policies of Bulgaria the Czech Republic and Poland Compliance with EU environmental regulations is especially onerous for Central and Eastern European countries because of the costs involved and the legacy of pollution from communist era industries But Andonova argues that EU integration has a positive impact on environmental policies in these countries by exerting a strong influence on the environmental interests of regulated industries With her empirical study of chemical safety and air pollution policies from 1990 to 2000 she shows that export competitive industries such as the chemical industry that would benefit from economic integration have an incentive to adopt EU norms By contrast industries such as electric utilities that primarily serve the domestic market remain opposed to EU environmental standards and must be prodded by their own governments to implement environmental protection measures These differences in domestic interests greatly influence the course of reforms and the adoption of EU standards Transnational Politics of the Environment challenges the current focus on intergovernmental cooperation between East and West by highlighting the roles of industries transnational norms and domestic institutions in promoting change in environmental regulation It offers a generalizable framework for understanding the politics of environmental regulation in emerging market economies and helps bridge the divide between the study of domestic and international environmental politics
