Revamping Architectural Education Rajesh Sharma, 2018-06-08 The book that you hold in your hands is a treasure trove of ideas to set into motion a new generation of learning for architects As the author is a practitioner of this technology called architecture he have often felt that globally it is the last field of knowledge that still displays vestiges of a holistic renaissance attitude of mind It has not fallen victim to our global love for economic development above all other considerations and is not always a handmaiden of consumerist culture Architects are somewhat obsessed with form Despite this or inspite of it the combine and harmonize the field of applied arts with the sciences the attitudes of engineering optimization with the expression of the visual arts covering subjects as diverse as chemistry and history India is possibly the world s largest future market for private sector architects today If we do not adapt our architectural practice starting with our architectural teaching practices we run the clear and present danger of becoming extinct in the race for economic development and urbanization which is truly sustainable resilient sufficient and equitable In reading this little gem of a book the author would urge the reader to look beyond formulae and descriptions and generatean agenda for reform beyond just the curriculum and towards transformation As Indian society struggles to understand its architects the profession owes a duty to itself to remain relevant to social needs and aspirations to create a nation of our dreams And the author hopes that the beginning of that agenda can befound in the pages of this book interpreted by every reader individually

Shaping the Futures of Work Nilanjan Raghunath,2021-09-15 The widespread belief that tech savvy educated millennials are well positioned to handle the challenges of the fourth industrial revolution is unfounded It does not fully grasp the reality of a flux society where relevant technological skills and knowledge are continuously changing no one is permanently tech savvy Millennials like other generations face the challenge of needing to continually reskill This has

compounded their struggle to begin their careers at a point when there is no longer any guarantee of lifetime employment or retirement at a set age *Shaping the Futures of Work* is a timely sociological exploration of the impact of technological innovations on employment Nilanjan Raghunath proposes that stakeholders such as states enterprises and citizens hold equally important roles in ensuring that people can adapt innovate and thrive within conditions of flux A promising model focuses on collaboration and proactive governance While good governance includes citizen engagement proactive governance goes one step further creating inclusive policies roadmaps and infrastructure for social and economic progress This book reveals that lifelong learning and adaptability are imperative even for well educated professionals Using Singapore and Singaporean millennials as a case study Raghunath examines proactive governance and delivers research and analysis to elucidate career trajectories pointing to a work ethic that aims to engage with technological futures Looking at local and global sociological literature to confirm the need for proactive governance *Shaping the Futures of Work* suggests that Singaporean millennials and professionals around the world need to better prepare themselves for flux risk failure and reinvention for career mobility
