THE REVENGE OF GAIA

EARTH'S CLIMATE CRISIS &
THE FATE OF HUMANITY

JAMES LOVELOCK

Revenge Of Gaia

James Lovelock

Revenge Of Gaia:

The Revenge of Gaia James Lovelock, 2006 The originator of the Gaia Theory argues that the Earth is a self regulating superorganism whose balance has been upset by the impact of global warming and that the resulting climate change could have dire results for human civilization

The Revenge of Gaia James Lovelock, 2007-08-02 In *The Revenge of Gaia* bestselling author James Lovelock father of climate studies and originator of the influential Gaia theory which views the entire earth as a living meta organism provides a definitive look at our imminent global crisis In this disturbing new book Lovelock guides us toward a hard reality soon we may not be able to alter the oncoming climate crisis Lovelock's influential Gaia theory one of the building blocks of modern climate science conceives of the Earth including the atmosphere oceans biosphere and upper layers of rock as a single living super organism regulating its internal environment much as an animal regulates its body temperature and chemical balance But now says Lovelock that organism is sick It is running a fever born of the combination of a sun whose intensity is slowly growing over millions of years and an atmosphere whose greenhouse gases have recently spiked due to human activity Earth will adjust to these stresses but on time scales measured in the hundreds of millennia It is already too late Lovelock says to prevent the global climate from flipping into an entirely new equilibrium state that will leave the tropics uninhabitable and force migration to the poles *The Revenge of Gaia* explains the stress the planetary system is under and how humans are contributing to it what the consequences will be and what humanity must do to rescue itself

The Revenge of Gaia James Lovelock, 2006 **The Vanishing Face of Gaia** James Lovelock, 2010-04-27 A preeminent environmental scientist contends that it's too late to reverse global warming and argues that mankind must prepare to adapt to a very hot future

The Revenge of Gaia Why the Earth is Fighting Back - and How We Can Still Save Humanity, 2007 James Lovelock one of the giants of environmental thinking argues passionately and poetically that although global warming is now inevitable we are not yet too late to save at least part of human civilization Not only is mankind on the brink of destroying itself and the Earth he argues but most of the alternative remedies that have been proposed or are already being adopted are also misguided We must take drastic action now to safeguard the future of human life

On the Destiny of Species Matthew Watkinson, 2009 Have you really accepted natural selection For those who believe in conservation *On the Destiny of Species* will not make comfortable reading In fact it will challenge you throughout because Life just isn't as fragile as we have been led to believe Yes giant pandas are fragile and yes polar bears are fragile relatively and yes even humans may be fragile but Life isn't about species it's about Life It's about pragmatic survival in a dynamic world Conservation is a hot topic these days Greenpeace Friends of the Earth and the WWF have 10 million members between them but after 30 years of research the author has no doubt that Nature's culling policy is ruthless for a reason and that human emotion is at best misplaced and often specifically detrimental as the domestic species clearly demonstrate Published on the 150th anniversary of *On the Origin of Species*

The Really Inconvenient Truths Iain
