Revolution In Time Clocks The Making:

Revolution in Time David S. Landes, 1983 More than a decade after the publication of his dazzling book on the cultural technological and manufacturing aspects of measuring time and making clocks David Landes has significantly expanded *Revolution in Time* In a new preface and scores of updated passages he explores new findings about medieval and early modern time keeping as well as contemporary hi tech uses of the watch as mini computer cellular phone and even radio receiver or television screen While commenting on the latest research Landes never loses his focus on the historical meaning of time and its many perceptions and uses questions that go beyond history that involve philosophers and possibly theologians and literary folk as well *Revolution in Time* David Saul Landes, 1985 *Stages of History* Phyllis Rackin, 2018-08-06 Phyllis Rackin offers a fresh approach to Shakespeare s English history plays rereading them in the context of a world where rapid cultural change transformed historical consciousness and gave the study of history a new urgency Rackin situates Shakespeare s English chronicles among multiple discourses particularly the controversies surrounding the functions of poetry theater and history She focuses on areas of contention in Renaissance historiography that are also areas of concern in recent criticism historical authority and causation the problems of anachronism and nostalgia and the historical construction of class and gender She analyzes the ways in which the presence of history in Shakespeare s theater participated and its representation in subsequent criticism still participates in the contests between opposed theories of history and between the different ideological interests and historiographic practices they authorize Celebrating the heroic struggles of the past and recording the patriarchal genealogies of kings and nobles Tudor historians provided an implicit rationale for the hierarchical order of their own time but the new public theater where socially heterogeneous audiences came together to watch common players enact the roles of their social superiors was widely perceived as subverting that order Examining such sociohistorical factors as the roles of women and common men and the conditions of theatrical performance Rackin explores what happened when elite historical discourse was transported to the public commercial theater She argues that Shakespeare s chronicles transformed univocal historical writing into polyphonic theatrical scripts that expressed the contradictions of Elizabethan culture **Handbook of Medieval Studies** Albrecht Classen, 2010-11-29 This interdisciplinary handbook provides extensive information about research in medieval studies and its most important results over the last decades The handbook is a reference work which enables the readers to quickly and purposely gain insight into the important research discussions and to inform themselves about the current status of research in the field The handbook consists of four parts The first large section offers articles on all of the main disciplines and discussions of the field The second section presents articles on the key concepts of modern medieval studies and the debates therein The third section is a lexicon of the most important text genres of the Middle Ages The fourth section provides an international bio bibliographical lexicon of the most prominent medievalists in all disciplines A comprehensive bibliography

rounds off the compendium The result is a reference work which exhaustively documents the current status of research in medieval studies and brings the disciplines and experts of the field together

Beyond Digital Capitalism: New Ways of Living Leo Panitch, Greg Albo, 2020-12-29 Essays that explore new ways of living with technological change Every year since 1964 the Socialist Register has offered a fascinating survey of movements and ideas from the independent new left This year's edition asks readers to explore just how we need to live with new technologies Essays in this 57th Socialist Register reveal the contradictions and dislocations of technological change in the twenty first century And they explore alternative ways of living from artificial intelligence AI to the arts from transportation to fashion from environmental science to economic planning Greg Albo Post capitalism Alternatives or detours Nicole Aschoff and Pankaj Mahta AI ideology Science capitalism and the dream of a people's AI Hugo Radice There is nothing artificial about AI Labour class utopia socialism Larry Lohman Interpretation machines Contradictions of digital mechanization in twenty first century capitalism Robin Hahnel Democratic socialist planning Against with and beyond the new technologies Tanner Mirrlees Platform socialists in the age of digital capitalism Derek Hrynshyn Imagining information socialism Bryan Palmer Capitalism and the clock Time's meaning in the struggle for socialism Sean Sweeney and John Treat Shifting gears Labour strategies for low carbon public transit mobility Adam Greenfield Smart cities technological traps democratic possibilities Christoph Hermann The consequences of commodification Contours of a post capitalist society Joan Sangster The surveillance of service labour Conditions and possibilities of resistance Jeronimo Montero Bressan Beyond neoliberal fashion Imagining clothing production as a human need Massimiliano Mollona Art Commons Art collectives and the post capitalist imagination Ingar Solty The world of tomorrow Scenarios for our future between demise and hope

Changing Clothes in China Antonia Finnane, 2008-01-24 Based largely on nineteenth and twentieth century representations of Chinese dress as traditional and unchanging historians have long regarded fashion as something peculiarly Western But in this surprising sumptuously illustrated book Antonia Finnane proves that vibrant fashions were a vital part of Chinese life in the late imperial era when well to do men and women showed a keen awareness of what was up to date Though foreigners who traveled to China in the early decades of the twentieth century came away with the impression that Chinese dress was simple and monotone the key features of modern fashion were beginning to emerge especially in Shanghai Men in blue gowns donned felt caps and leather shoes girls began to wear fitted jackets and narrow pants and homespun garments gave way to machine woven cloth often made in foreign lands These innovations marked the start of a far reaching vestimentary revolution that would transform the clothing culture in urban and much of rural China over the next half century Through Finnane's meticulous research we are able to see how the close fitting jacket and high collar of the 1911 Revolutionary period the skirt and jacket blouse of the May Fourth era and the military style popular in the Cultural Revolution led to the variegated globalized wardrobe of today She brilliantly connects China's modernization and global visibility with changes in dress offering a vivid portrait of the complex subtle and

sometimes contradictory ways the people of China have worn their nation on their backs **"Eastern Magnificence & European Ingenuity"** Catherine Pagani,2001 An exploration of the important role played by elaborate clockwork in relations between China and Europe from the late sixteenth to the late eighteenth centuries **A Grand Complication** Stacy Perman,2013-02-19 Two wealthy and powerful men engage in a decades long contest to create and possess the most remarkable watch in history James Ward Packard of Warren Ohio was an entrepreneur and a talented engineer of infinite curiosity a self made man who earned millions from his inventions including the design and manufacture of America s first luxury car the elegant and storied Packard Henry Graves Jr was the very essence of blue blooded refinement in the early 1900s son of a Wall Street financier a central figure in New York high society and a connoisseur of beautiful things especially fine watches Then as now expensive watches were the ultimate sign of luxury and wealth but in the early twentieth century the limitless ambition wealth and creativity of these two men pushed the boundaries of mathematics astronomy craftsmanship technology and physics to create ever more ingenious timepieces In any watch features beyond the display of hours minutes and seconds are known as complications Packard and Graves spurred acclaimed Swiss watchmaker Patek Philippe to create the Mona Lisa of timepieces a fabled watch that incorporated twenty four complications and took nearly eight years to design and build For the period it was the most complicated watch ever created For years it disappeared but then it surfaced at a Sotheby s auction in 1999 touching off a heated bidding war shattering all known records when it fetched 11 million from an anonymous bidder New York Times bestselling author Stacy Perman takes us from the clubby world of New York high society into the ateliers of the greatest Swiss watchmakers and into the high octane often secretive subculture of modern day watch collecting With meticulous research vivid historical details and a wealth of dynamic personalities A Grand Complication is the fascinating story of the thrilling duel between two of the most intriguing men of the early twentieth century Above all it is a sweeping chronicle of innovation the desire for beauty and the lengths people will go to possess it **Time , Subversive Spiritualities** Frédérique Apffel-Marglin,2011 Even in the twenty first century some two thirds of the world s peoples quietly live in non modern non cosmopolitan places In such places the multitudinous voices of the spirits deities and other denizens of the other than human world continue to be heard continue to be loved or feared or both continue to accompany human beings in all their activities In Subversive Spiritualities Fr d rique Apffel Marglin draws on a lifetime of work with the indigenous peoples of Peru and India to support her argument that the beliefs values and practices of such traditional peoples are eco metaphysically true In other words they recognize that human beings are in communion with other beings in nature that have agency and are kinds of spiritual intelligences with whom humans can be in relationship and communion Ritual is the medium for communicating reciprocating creating and working with the other than humans who daily remind the humans that the world is not for humans exclusive use Apffel Marglin argues that when such relationships are appropriately robust human lifeways are rich rewarding and in the contemporary jargon environmentally

sustainable Her ultimate objective is to re entangle humans in nature by promoting a spirituality and ecology of belonging and connection to nature and an appreciation of animistic perception and ecologies Along the way she offers provocative and poignant critiques of many assumptions of the development paradigm as benign including feminist forms of development advocacy of most anthropological and other social scientific understandings of indigenous religions and of common views about peasant and indigenous agronomy She concludes with a case study of the fair trade movement illuminating both its shortcomings how it echoes some of the assumptions in the development paradigms and its promise as a way to rekindle community between humans as well as between humans and the other than human world
