Revolution Revisited:

The Anatomy of Revolution Revisited Bailey Stone, 2014 This study aims to update a classic of comparative revolutionary analysis Crane Brinton's 1938 study *The Anatomy of Revolution* It invokes the latest research and theoretical writing in history political science and political sociology to compare and contrast in their successive phases the English Revolution of 1640-60 the French Revolution of 1789-99 and the Russian Revolution of 1917-29 This book intends to do what no other comparative analysis of revolutionary change has yet adequately done It not only progresses beyond Marxian socioeconomic class analysis and early revisionist stresses on short term accidental factors involved in revolutionary causation and process it also finds ways to reconcile state centered structuralist accounts of the three major European revolutions with postmodernist explanations of those upheavals that play up the centrality of human agency revolutionary discourse mentalities ideology and political culture

Beyond the Enclave Godfrey Kanyenze, Timothy Kondo, 2011-07-26 *Beyond the Enclave* sets out to unravel the contradiction of a country Zimbabwe where a rich diverse resource base co exists with endemic poverty One reason lies in the colonial economy which was predicated on an ideology of white supremacy creating an enclave formal economy employing one fifth of the labour force Yet over three decades after independence the non formal segment has become even more entrenched This book assesses Zimbabwes economy through three main phases 1980-90 when a strong social policy framework proved difficult to sustain due to erratic growth and 1991-96 when structural adjustment demanded a market driven approach to development The third phase is characterized by crisis management leading to policy inconsistencies and reversals Not surprisingly such incoherence saw the economy descend into hyperinflation and paralysis in 2007-2008 leading to the signing of the Global Political Agreement in September 2008 In the absence of formal dollarization economic recovery after the adoption of the multi currency regime has remained fragile leaving an estimated 70 per cent of the population outside the banking system This has further entrenched uneven enclave growth as the economy remains locked in a low income poverty trap There is a need to facilitate transition towards formality to promote decent jobs Furthermore a strategic developmental role for the state in the economy is now widely recognized as vital for development *Beyond the Enclave* argues for a new approach to development in Zimbabwe based on pro poor and inclusive strategies which will contribute to the well being of all of its citizens and wise stewardship of its resources It offers suggestions on policy formulation implementation monitoring and evaluation in all sectors designed to promote inclusive growth and humane development

Revolution Rosemary H. T. O'Kane, 2000 All of the major work on the subject of revolutions is collected in this useful set Including work from seminal figures such as Hatto and Gottschalk in the 1940s as well as the most important literature all the way through 1998 the articles reprinted here consider the concept theory and causes of revolution revolutionary state building and the outcomes of revolutions case studies of great revolutions and much more

Rethinking Revolutionary Change in Europe Bailey Stone, 2020-02-17 Reconsidering the English French and

Russian Revolutions this book offers an important new approach to the theoretical and comparative study of revolutions Bailey Stone proposes an innovative neostructuralist integration of competing structuralist and postmodernist theory Providing a balanced and nuanced critique of both sides he presents new ways of understanding radical change in the European polities that created the concept and the dramatic realities of modern revolution He focuses on the central issues of modernizers versus traditionalists old regime bourgeoisies regicides terror and state legitimacy By reconciling political and cultural theories of revolutionary causation and process Stone s synthesis marks a critical advance in our understanding of revolution

Rural Development and the Construction of New Markets Paul Hebinck, Sergio Schneider, Jan Douwe van der Ploeg, 2014-09-15 This book focuses on empirical experiences related to market development and specifically new markets with structurally different characteristics than mainstream markets Europe Brazil China and the rather robust and complex African experiences are covered to provide a rich multidisciplinary and multi level analysis of the dynamics of newly emerging markets Rural Development and the Construction of New Markets analyses newly constructed markets as nested markets Although they are specific market segments that are nested in the wider commodity markets for food they have a different nature different dynamics a different redistribution of value added different prices and different relations between producers and consumers Nested markets embody distinction viz a viz the general markets in which they are embedded A key aspect of nested markets is that these are constructed in and through social struggles which in turn positions this book in relation to classic and new institutional economic analyses of markets These markets emerge as steadily growing parts of the farmer populations are dedicating their time energy and resources to the design and production of new goods and services that differ from conventional agricultural outputs The speed and intensity with which this is taking place and the products and services involved vary considerably across the world In large parts of the South notably Africa farmers are structurally combining farming with other activities By contrast in Europe and large parts of Latin America farmers have taken steps to generate new products and services which exist alongside ongoing agricultural production This book not only discusses the economic rationales and dynamics for these markets but also their likely futures and the threats and opportunities they face

Political Investigations Robert Fine, 2005-07-08 In this highly innovative book Robert Fine compares three great studies of modern political life Hegel s Elements of the Philosophy of Right Marx s Capital and Hannah Arendt s Origins of Totalitarianism and argues that they are all profoundly radical texts which jointly contribute to our understanding of the modern world Fine maintains that these works are far more revealing when read together than in opposition and draws a direct parallel between Hegel s critique of social forms of right and Marx s critique of social forms of value Fine shows how fruitfully their work can and should be combined Hannah Arendt was in turn critical of what she saw as the historicism of both Hegel and Marx but Fine argues that her study of the origins of totalitarianism directly picks up on their insights into the modern potential for fanaticism and destructiveness Arendt never disavowed any of the nineteenth century thinkers who

prefigured the catastrophes to come but Fine shows her indebtedness to Hegel and Marx This fascinating book offers a re reading of these texts as three pivotal moments in the construction of a critical humanist tradition **Military Chaplains' Review** ,1974
