Revolution in Land Charles Abrams, 1939 **Revolution in Land** Charles Abrams, 1939 Land and Revolution in Modern Greece, 1800-1881 William W. McGrew, 1985 *Interpreting the Ethiopian Revolution* Etana H. Dinka, 2025-10-16

Fifty years after the 1974 Ethiopian revolution Etana H Dinka brings together a who's who of modern Ethiopian studies in order to offer this long overdue analysis of the revolution and its legacies With contributions both from seasoned academics many of whom wrote about the revolution as it developed and from representatives of a younger generation this six part collection offers new insights not only into the revolution itself but also into issues such as the Red Terror the EPRDF revolution of 1991 and Abiy Ahmed's repositioning of Ethiopia after 2018 Such wide ranging analyses cumulatively cast Ethiopia's three successive post revolution regimes not as separate entities but rather as successive attempts to fulfil the promise of the revolution surrounding issues such as ethnicity the nationalities question economic development and the land tenure question In developing this model the collection captures the defining developments and issues in Ethiopia the Horn and the Red Sea region over the past fifty years and it speaks directly to a global body of knowledge about revolutions state making projects and empires and warfare and military interventions in politics A unique collection that expands the historical revolutionary analyses of Ethiopian politics and society to the present in order to suggest new ways of ensuring social economic and environmental justice for all this book is a must read for researchers and upper level students interested in Ethiopia the Horn of Africa African Studies and revolutionary politics and land economics in general **The industrial revolution and land transformation** David Brian Grigg, 1987 The Law of the Land John Opie, 1994-01-01 This book provides fascinating insights into how present day American land legislation has evolved In doing so the author identifies the many problems that the family farmer has had to face over the past two centuries at the hands of the weather unstable product prices and corrupt and venal politicians *Journal of Agricultural Economics* A provocative learned polemical contribution to the debate on the nature of the farm problem and the means to solve it Throughout our history Opie a historian convincingly argues contradictory goals have produced contradictory policies that are the sources of our current problems *Science* This important volume offers a reinterpretation of public lands history as it relates to contemporary farm policy Opie's signal contribution is to examine and evaluate the many policy strands of a twentieth century safety net designed by Congress to sustain the family farm *Journal of American History* Bright passionate and entirely convincing *Journal of Rural Studies* The Law of the Land has made a significant contribution to agricultural and public policy history by pointing out that American ideals have shaped policies and assigned roles that have often left farmers and farmland vulnerable Public Historian The five years that have passed since this book was first published have been enough to conclude that John Opie can reconstruct the past and predict the future Many of the problems he foresaw have come to pass and some of the solutions he discussed have been adopted Anyone interested in the basic environment will find that this volume gives a

clear picture of how we got to where we are today in the use and misuse of natural resources Environmental History Review

A professor of history at the New Jersey Institute of Technology John Opie is also director of the Center for Technology Studies and founding editor of Environmental History Review His other publications include Ogallala Water for a Dry Land Nebraska 1993 *Programme of the World Revolution* Nikolai Bukharin, 1920 **The Independent** Leonard Bacon, Joseph Parrish Thompson, Richard Salter Storrs, Joshua Leavitt, Henry Ward Beecher, Theodore Tilton, Henry Chandler Bowen, William Hayes Ward, Hamilton Holt, Fabian Franklin, Harold de Wolf Fuller, Christian Archibald Herter, 1913 **Property Rights in a Social and Ecological Context** Susan Hanna, Mohan Munasinghe, 1995-01-01 The collection of papers in the book Property Rights and the Environment Social and Ecological Issues 6 and this companion volume examine the relationships between people the environment and property rights and the ways in which a given social and ecological context affects those relationships The papers are products of a research program at the Royal Swedish Academy of Sciences Stockholm The main objective of the program was to convene social scientists and natural scientists to address research questions in their full social and ecological dimensions The program's participants addressed five general issues related to property rights and the environment 1 the design of governance systems for sustainability 2 the relationship between equity stewardship and environmental resilience 3 the use of traditional knowledge in resource management 4 the mechanisms that link people to their environments and 5 the role played by population and poverty This volume presents case studies that address questions of design application in those five areas 6 Also available Property Rights and the Environment Social and Ecological Issues ISBN 0 8213 3415 8 Stock No 13415 **Great Land Rush and the Making of the Modern World, 1650-1900** John C. Weaver, 2003-04-24 He also underscores the tragic history of the indigenous peoples of these regions and shows how they came to lose possession of their land to newly formed governments made up of Europeans with European interests at heart Weaver shows that the enormous efforts involved in defining and registering large numbers of newly carved out parcels of property for reallocation during the Great Land Rush were instrumental in the emergence of much stronger concepts of property rights and argues that this period was marked by a complete disregard for previous notions of restraint on dreams of unlimited material possibility Today while the traditional forms of colonization that marked the Great Land Rush are no longer practiced by the European powers and their progeny in the new world the legacy of this period can be seen in the western powers insatiable thirst for economic growth including newer forms of economic colonization of underdeveloped countries and a continuing evolution of the concepts of property rights including the development and increasing growth in importance of intellectual property rights
