Revolutionary Currents Nation Building In The Transatlantic World 1688 1821:

Empire to Nation Joseph W. Esherick, Eric Van Young, Hasan Kayali, 2006-05-04 The fall of empires and the rise of nation states was a defining political transition in the making of the modern world As United States imperialism becomes a popular focus of debate we must understand how empire the nineteenth century s dominant form of large scale political organization had disappeared by the end of the twentieth century Here ten prominent specialists discuss the empire to nation transition in comparative perspective Chapters on Latin America the Middle East Eastern Europe Russia and China illustrate both the common features and the diversity of the transition Questioning the sharpness of the break implied by the empire nation binary the contributors explore the many ways in which empires were often nation like and nations behaved imperially While previous studies have focused on the rise and fall of empires or on nationalism and the process of nation building this intriguing volume concentrates on the empire to nation transition itself Understanding this transition allows us to better interpret the contemporary political order and new forms of global hegemony

Nationalism in the New World Don H. Doyle, Marco Antonio Pamplona, 2010-01-25 Nationalism in the New World brings together work by scholars from the United States Canada Latin America and Europe to discuss the common problem of how the nations of the Americas grappled with the basic questions of nationalism Who are we How do we imagine ourselves as a nation Debates over the origins and meanings of nationalism have emerged at the forefront of the humanities and social sciences over the past two decades However these discussions have been mostly about nations in Europe the Middle East Asia or Africa In addition their focus is usually on the violence spawned by ethnic and religious strains of nationalism which have been largely absent in the Americas The contributors to this volume Americanize the conversation on nationalism They ask how the countries of the Americas fit into the larger world of nations and in what ways they present distinctive forms of nationhood Such questions are particularly important because as the editors write the American nations that came into being in the wake of revolutions that shook the Atlantic world beginning in 1776 provided models of what the modern world might become American nations were among the first nation states to emerge on the world stage As former colonies with multiethnic populations American nations could not logically rest their claim to nationhood on ancient bonds of blood and history Out of a world of empires and colonies the independent states of the Americas forged new nations based on a varied mix of modern civic ideals instead of primordial myths on ethnic and religious diversity instead of common descent and on future hopes rather than ancient roots

Greene, 2013 In these essays Greene explores the efforts to impose Old World institutions identities and values upon the New World societies being created during the colonization process He shows how transplanted Old World components political legal and social were adapted to meet the demands of new economically viable expansive cultural hearths Green argues that these transplantations and adaptations were of fundamental importance to the formation and evolution of the new American republic and the society it represented Back cover of paperback **The**
