

Педагогика на овладяване на езика и развитие на речта – 5-ти въпрос

Овладяването на езика и развитието на речта в предучилищна възраст се реализира съвсем закономерно в контекста на процеса по разширяване и увеличаване на социалните връзки на детето със света, в търсенето и използването на играта като филтър на социалната информация. Последната може да се прояви изключително в съвместната дейност между отделните членове на групата. Не се подценява и индивидуалността като спонтанно проявление, даващо насоки на действие на детето и имащо подбудителна функция, както и оценката на генерализираните други – връстници, родители, възпитатели, която изпълнява регулираща функция. При взаимодействието на тези две функции се реализират, от една страна – възможностите на детето за иновация, а от друга – социалният контрол. Тук механизмите на игровата дейност, стимулирани от културата, съдействат за социализирането на детето, за навлизането му в света.

Целите на този процес на овладяване на езика и развитие на речта при детето се постигат чрез специфична образователно-възпитателна система, която е съобразена с изключителните в тази възраст потенциални възможности на детето, със сензитивността на възрастовия период, както и с принципа на компенсация между принципа на възпитанието и възможното обучение – така че да се елиминират безконфликтно някои негативни тенденции в езиковото развитие. Структурата на езиковите способности на детето се разглежда предимно в сферата на речевото общуване, което е предпоставка за развиване на комуникативността.

Главни цели:

Дайте възможност на детето:

- Да развие своята устна реч
- Да овладява значението на думите
- Да разширява, основно значение на думите
- Да свързва думите в изречения
- Да може съвместно и граматически правилно да изразява своите мисли
- Да използва адекватни словесни средства и речеви фрази в общуването
- Да открива личностния смисъл на езиковото изразяване и мястото на езика и речта в съвместното действие
- Да осъзнава езиковите комуникативни ситуации
- Да осъзнава законовото кодиране на езика
- Да проявява интерес към писмената реч
- Да проявява интерес към чуждите езици

Разширяването и задълбочаването на детската личност със света става чрез едно от главните средства на общуването – езика. Така връзката между комуникация и социализация предоставят освен възможност за овладяване на някои от основните средства за комуникация, но и акцентирание на тези педагогически въздействия, които способстват в контекста на общуването детето да подбере адекватни речевы средства, които най-добре отговарят на целите му. Но трябва да се обърне сериозно внимание на феномен, който често пъти е както средство, така и продукт на социализацията, а именно – междуличностното възприятие. Взаимоотношението „дете-култура“ се
