demanding work by 23 teams and required humanoid robots to perform challenging locomotion and manipulation tasks in a mock disaster site The challenge was conceived as a response to the Japanese Fukushima nuclear disaster of March 2011 The Fukushima disaster was seen as an ideal candidate for robotic intervention since the risk of exposure to radiation prevented human responders from accessing the site This volume edited by Matthew Spenke Stephen Buerger and Karl Iagnemma includes commentary by the organizers overall analysis of the results and documentation of the technical efforts of 15 competing teams The book provides an important record of the successes and failures involved in the DARPA Robotics Challenge and provides guidance for future needs to be addressed by policy makers funding agencies and the robotics research community Many of the papers in this volume were initially published in a series of special issues of the Journal of Field Robotics We have proudly collected versions of those papers in this STAR volume

**Robots Won't Save Japan** James Adrian Wright, 2023-02-15 Robots Won't Save Japan addresses the Japanese government's efforts to develop care robots in response to the challenges of an aging population rising demand for eldercare and a critical shortage of care workers Drawing on ethnographic research at key sites of Japanese robot development and implementation James Wright reveals how such devices are likely to transform the practices organization meanings and ethics of caregiving if implemented at scale This new form of techno welfare state that Japan is prototyping involves a reconfiguration of care that deskills and devalues care work and reduces opportunities for human social interaction and relationship building Moreover contrary to expectations that care robots will save labor and reduce health care expenditures robots cost more money and require additional human labor to tend to the machines As Wright shows robots alone will not rescue Japan from its care crisis The attempts to implement robot care instead point to the importance of looking beyond such techno fixes to consider how to support rather than undermine the human times spaces and relationships necessary for sustainably cultivating good care
